

# **USER GUIDE FOR MAGENTO 2 EXTENSION AJAX FILTERS**

**Version : 1.0.0**

The Ajax Filters extension provides easy filtration of products in the category and search pages when clicked on the filters in layered navigation.

# AJAX FILTERS

## 1. Features :

The Ajax Filters extension's features are listed below ,

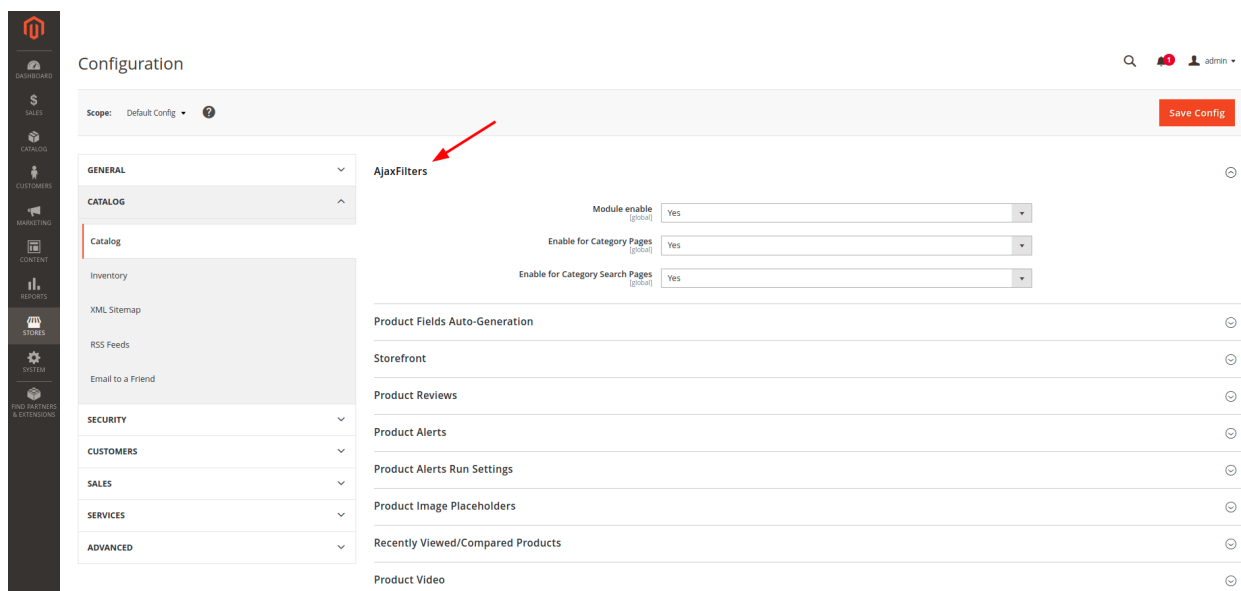

1. This extension is supported in the category and search pages.
2. Can enable/disable this extension for specific pages like category page and search page in admin configurations.
3. All the filters click will work with filtering the products without the need of page reload.

## 2. Configuration settings for AjaxFilter:

A simple configuration will activate the AJAX FILTERS in your website. Below are the path and field details to configure

### Path to configure

1. For changing this extension use such as Enabling and Disabling , please find this path here as in the screenshot to do so.
2. Go to Stores->Configuration->Catalog->Catalog->Ajax Filters.
3. Below that you will find all the configurations.

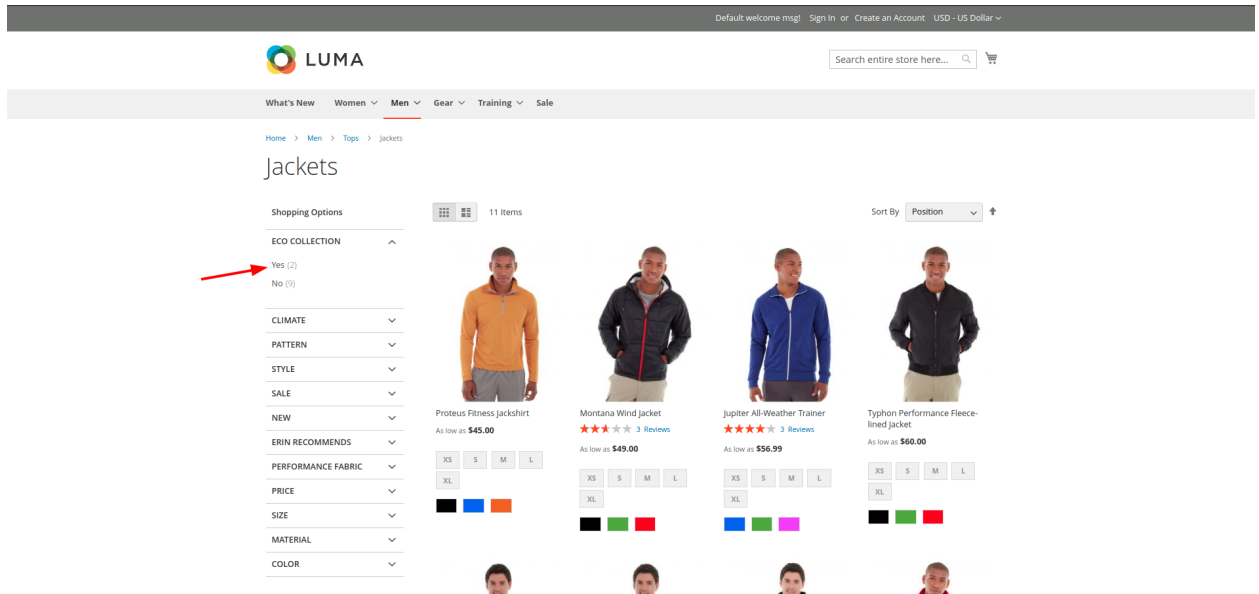

The screenshot shows the Magento 2 Configuration page. On the left sidebar, the 'CATALOG' menu is expanded, and 'Catalog' is selected. The main content area shows the 'AjaxFilters' configuration section. A red arrow points to the 'AjaxFilters' label. The configuration includes three dropdown menus for enabling the module and for category pages and search pages. Below these are several other configuration options like 'Product Fields Auto-Generation', 'Storefront', 'Product Reviews', 'Product Alerts', 'Product Alerts Run Settings', 'Product Image Placeholders', 'Recently Viewed/Compared Products', and 'Product Video'.

## 3. Frontstore View

### 3.1. The extension in the category page:

1. This extension works when clicked on any filters in the layered navigation in the category pages and search pages , please the attached screenshot of the clicking in the filters.

### 3.2. The extension in the search page:

1. In the search page also, the working of this extension is the same as in the category page.
