Paid On Results User Guide for Magento 2.x

- 8) Run below command in Magento root directory from terminal to deploy to content after the run to clean cache

php bin/magento setup:static-content:deploy php

bin/magento cache:clean

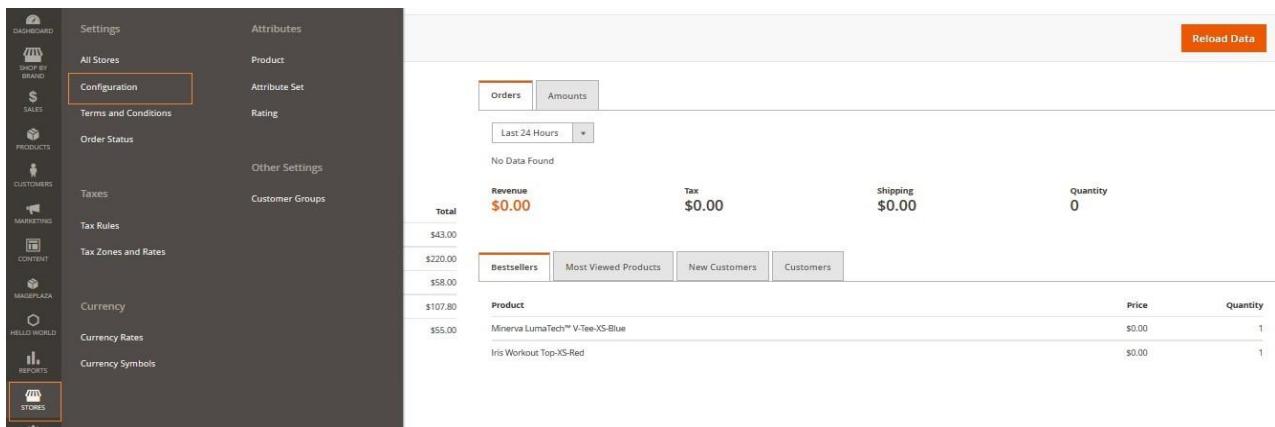

php bin/magento setup:upgrade --keep-generated

- 9) After then you need Merchant ID. Register into your <https://www.paidonresults.com/join-us.html> register then you get the Merchant ID.

The features of the modules are:

1. Simple integration
2. Just put in your Merchants ID
3. Select includes VAT or not
4. Save it and you're done.

Please understand the enabling part with the use of images:

The screenshot displays the Magento 2 admin interface. On the left, the sidebar menu has the 'STORES' option highlighted with a red box. The main content area shows the 'Orders' section, with a 'Reload Data' button in the top right corner. Below the 'Orders' header, there is a 'Last 24 Hours' filter and a 'No Data Found' message. A summary table shows the following data:

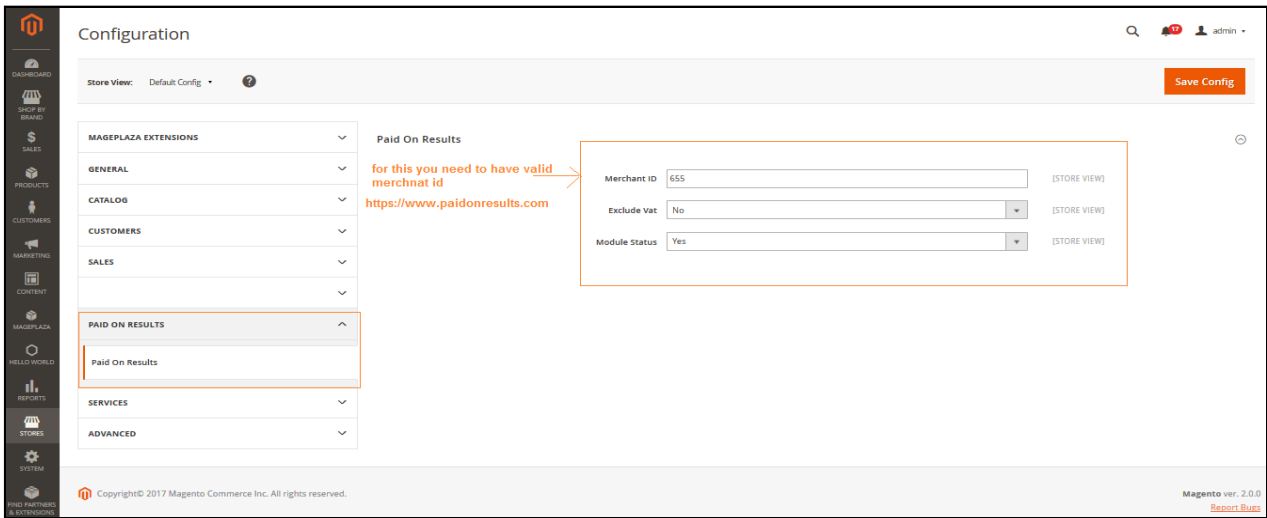

Total	Revenue	Tax	Shipping	Quantity
\$43.00	\$0.00	\$0.00	\$0.00	0

Below the summary table, there are tabs for 'Bestsellers', 'Most Viewed Products', 'New Customers', and 'Customers'. The 'Bestsellers' tab is active, showing a table of products:

Product	Price	Quantity
Minerva LumaTech™ V-Tee-XS-Blue	\$0.00	1
Iris Workout Top-XS-Red	\$0.00	1

Please feel free to connect with support@paidonresults.com for any concern related to the module.

Paid On Results User Guide for Magento 2.x

Here the first step is to provide the Merchant ID: Merchant ID is the unique numerical digit provided by the <https://www.paidonresults.com/>. By this merchant ID, the module will get all the related details from the thank you page of the website and allows other information to be shown on Paid on result portal and from there users can able to see and track all the sale's details.

Apart from merchant ID, users need to put “Yes” on the status and the accordingly user can allow showing their VAT details using “Yes and No” options. After providing and selecting all the given parameters users need to save the configuration.

Compatible with: 2.0.x, 2.1.x, 2.2.x

Please feel free to connect with support@paidonresults.com for any concern related to the module.
