

PayBright Payment Gateway Integration For Magento

Installation guide:

1. Log in to [Commerce Marketplace](#) with the username and password you used to purchase the extension.
2. In the upper-right corner, click Your name > My Profile.

3. Click My Purchases

4. Find the extension you want to install and click Technical Details

Magento 2

Commerce on Cloud (ECE)

Live Search

Component name:

magento/live-search

Versions available

v1.1.0

5. Navigate to your Magento project directory and update your composer.json file.

```
composer require <component-name>:<version>
```

6. Enter your [authentication keys](#). Your public key is your username; your private key is your password.

7. Wait for Composer to finish updating your project dependencies and make sure there aren't any errors.

8. Execute following console commands:

```
php bin/magento module:enable PayBright_Payment
```

```
php bin/magento setup:upgrade
```

9. Recompile your Magento project: In Production mode, you may receive a message to "Please rerun Magento compile command". Magento does not prompt you to run the compile command in Developer mode.

```
php bin/magento setup:di:compile
```
