

## Fixed Range Calendar 1.0 for Magento 2

Check the latest README:

<http://hottons.com/demo/m2/ofr/README.html>

This extension allows customer to select fixed date range.

Sold out dates become not available for selection.

You can use specify fixed price for number of days or custom price for some period.

It is possible to specify maximum number of orders (In Stock) per product.

You can disable holidays and weekends.

The same calendar can be used for multiple products.

All ordered dates can be viewed on edit product page in Magento admin panel.

Selected date range by customer is saved in product text field custom option. So it is visible on order info page and in order confirmation emails.

2) Connect to your website via SSH:

Type in the terminal (also known as console or command line) on your computer:

```
ssh -p 22 username@yourdomain.com
```

Then enter your server password

If you are connected to your server change directory with command:

```
cd /full_path_to_your_magento_root_directory
```

Update magento modules with command:

```
bin/magento setup:upgrade
```

NOTE: If it shows permission error make it executable with command: `chmod +x bin/magento`

## Example of how to use it

1) Create Calendar

Go to *Catalog* -> *Option Calendar* ([screenshot](#))

Add new Calendar:

Calendar Title: **New Calendar**

[screenshot](#)

On the "Ranges" tab add two price ranges:

**01/14/2021 - 07/29/2021 10.00**

**08/01/2021 - 12/27/2021 20.00**

[screenshot](#)

Save the calendar.

2) Apply calendar to product

Go to *Catalog* -> *Products*

1. Open your product.

2. Add new custom option with type "Radio Button", title "Number of Days" and add three option values: "Three days", "Seven days", "Custom Selection".

3. Add second custom option with type "Field" and title "Choose Date". ([screenshot](#))

4. Save the product with new custom options.

5. In the "Option Calendar" tab select:

Calendar - your calendar.

Parent Option - the "Number of Days" option.

Number of selectable days:

Three days - 4

Seven days - 8

Custom Selection - 0

Text Field Custom Option - the "Choose Date" option.

([screenshot](#))

6. Save the product.

7. Check the result on the front-end.

If you click on the "Choose Date" text field the calendar should appear. ([screenshot](#))

Try to select a date range and add the product to the shopping cart.

On the shopping cart page the total price should include the price of the selected options. ([screenshot](#))

[Back to the index](#)

## Configuration

You can change date format, disable holidays and weekends in:

*Stores -> Configuration -> Option Calendar -> Settings*

([screenshot](#))

The "Allow to select next working day" option means that calendar will allow customer to select next available day if the last selected day (Return day) is holiday or weekend.

This is applicable only for calendar type "Fixed number of days".

[Back to the index](#)

## Translate calendar

Translate the file:

`app/code/Pektsekye/OptionFixedRange/i18n/en_US.csv`

Then refresh magento cache

[Back to the index](#)

## Troubleshooting

- Calendar does not appear at front-end:

Check if calendar is enabled in *Catalog -> Option Calendar* ([screenshot](#))

Check if product has custom option with type "Field" ([screenshot](#))

Calendar with type "Fixed number of days" also requires "Radio Buttons" custom option.

Check if product has Calendar, Text field custom option and all other required fields selected in the "Option Calendar" tab on the edit product page. ([screenshot](#))

- If you are not sure whether a problem is because of this extension or not.

Try to disable this extension by setting:

'Pektsekye\_OptionFixedRange' => 0,

in the file:

app/etc/config.php
