1 Overview

Cash on Delivery allows you to book an additional fee for inland and international deliveries.

2 Installation

To ensure a smooth installation, please follow the procedure below:

1. Make a database backup
2. Make a backup of your current code, if you import a new version of the module
3. Deactivate Magento caching and log out of the admin area
4. Copy the contents of the archive (or the unpacked directory) according to the directory structure into your Magento root directory. Please confirm any dialogs if files should be overwritten
5. Open the admin area in the browser. The module will be installed now
6. Log in to the admin area
7. Enable caching

3 Setup

You can enable and configure the payment method in the system configuration (**Stores > Configuration > Sales > Payment Methods > Phoenix Cash on Delivery**).

There you will find the following configuration settings. You can select a fixed fee or one calculated as a percentage of the subtotal.

Cash on Delivery		
Enabled	<input type="text" value="Yes"/>	[STORE VIEW]
Display Zero Fee	<input type="text" value="No"/>	[STORE VIEW]
Title	<input type="text" value="Pay on delivery"/>	[STORE VIEW]
New order status	<input type="text" value="Pending"/>	[STORE VIEW]
Sort order	<input type="text" value="15"/>	[STORE VIEW]
Shipment to applicable countries	<input type="text" value="All Allowed Countries"/>	[STORE VIEW]
Minimum Order Total	<input type="text"/>	[WEBSITE]
Maximum Order Total	<input type="text"/>	[WEBSITE]
Cost calculation	<input type="text" value="Fixed"/>	[STORE VIEW]
Costs for inland shipping	<input type="text" value="5"/>	[STORE VIEW]
Costs for shipping to foreign countries	<input type="text" value="10"/>	[STORE VIEW]
Custom text for checkout page	<div style="border: 1px solid #ccc; padding: 5px; min-height: 100px;">Nothing will be charged now. Please have cash or a debit/credit card ready at delivery.</div>	[STORE VIEW]
Disallow specific shipping methods	<input type="text" value="No"/>	[STORE VIEW]

In detail, the options available to you are:

- **Enabled** – activates the payment method
- **Display Zero Fee** – if activated, will display the fee even if the calculated fee is equal to zero
- **Title** – allows you to define a custom payment title. As this is a store-view level setting, you can use it for localization

- **New order status** – defines what status newly created orders should be set to after selecting this payment method
- **Sort order** – defines how the payment method will be sorted during payment method selection
- **Shipment to applicable countries** – allows you to restrict usage of this payment method to selected countries
 - **Shipment to Specific countries** – available if *Specific Countries* is selected; allows you to choose to which countries the order can be shipped for this method to be available
- **Minimum Order Total** – defines the minimum subtotal of the order for the payment method to be available
- **Maximum Order Total** – defines the upper limit for the subtotal above which this payment method will not be available
- **Cost calculation** – defines how the fee is calculated and what the following options mean
 - *Fixed* – the fee is fixed and equal to the defined value in the store base currency
 - *Percentage* – the defined value is a percentage rate which will be applied to the order subtotal to calculate the fee
- **Costs for inland shipping** – defines the value for the fee when shipping to an inland destination
 - **Costs for inland shipping (minimum)** – only available when **Cost calculation** is set to *Percentage*; this will be the fee if the calculated inland value falls below it
- **Costs for shipping to foreign countries** – defines the value for the fee when shipping abroad
 - **Costs for shipping to foreign countries (minimum)** – only available when **Cost calculation** is set to *Percentage*; this will be the fee if the calculated abroad value falls below it
- **Custom text for checkout page** – allows you to add an additional text to the payment method selection during checkout
- **Disallow specific shipping methods** – allows you to restrict usage of this payment method when the specified shipping methods are selected
 - **Disallowed shipping methods** – select shipping methods which will disable Cash on Delivery during payment method selection

There are additional settings in the **Sales > Tax** section of the configuration:

- **Tax Classes > Tax Class for Cash on Delivery Fee** – defines the tax class for the delivery fee

- **Calculation Settings > Cash on Delivery fee include tax** – defines if the calculated fee already includes tax or not
- **Price Display Settings > Display Cod Fee** – defines how the fee and its tax should be displayed

4 Usage

After configuration, Cash on delivery is available as a payment method with the chosen title:

CHECKOUT

- 1 BILLING INFORMATION [Edit](#)
