1 Overview

Cash on Delivery allows you to book an additional fee for inland and international deliveries.

2 Installation

To ensure a smooth installation, please follow one of the procedures below:

2.1 Magento Marketplace installation via the Magento 2 Web Setup Wizard

This is the simplest way to install the module. Follow these installation steps:

1. In the admin area of Magento, go to **System > Web Setup Wizard** and click on **Extension Manager**.
2. If you have not yet entered any access keys, get them via your Magento account. For more information, consult the [Magento Marketplace User Guide](#).
3. If necessary, update the module list and click **Review and Install** to select extensions for installation.
4. Select the Cash on Delivery module and click **Install**.
5. Follow the on-screen instructions.

2.2 Manual installation

If you need or want to install the extension manually, follow these installation steps:

1. Create a database backup.
2. If upgrading, create a backup of the current code
3. In `app/code`, create the following directory structure if it does not exist yet: `Phoenix/CashOnDelivery`
4. Copy the contents of the archive into the directory from the previous step. Please confirm file overwriting if necessary.
5. In the command line interface, execute the following commands:
 - a. `php bin/magento setup:upgrade`
 - b. `php bin/magento setup:di:compile`
 - c. `php bin/magento setup:static-content:deploy` (if needed for your server configuration)
6. Log out and into the admin area.

3 Setup

You can enable and configure the payment method in the system configuration (**Stores > Configuration > Sales > Payment Methods > Phoenix Cash on Delivery**).

There you will find the following configuration settings. You can select a fixed fee or one calculated as a percentage of the subtotal.

Enabled <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Title <small>[store view]</small>	Pay on delivery	<input type="checkbox"/> Use system value
Display Zero Fee <small>[store view]</small>	No	<input checked="" type="checkbox"/> Use system value
New order status <small>[store view]</small>	Pending	<input checked="" type="checkbox"/> Use system value
Payment from Applicable Countries <small>[store view]</small>	All Allowed Countries	
Minimum Order Total <small>[store view]</small>		
Maximum Order Total <small>[store view]</small>		
Cost calculation <small>[store view]</small>	Fixed	<input type="checkbox"/> Use system value
Cost for inland shipping <small>[store view]</small>	5	
Cost for shipping to foreign countries <small>[store view]</small>	10	
Custom text for checkout page <small>[store view]</small>	Nothing will be charged now. Please have cash or a debit/credit card ready at delivery.	
Disallow specific shipping methods <small>[store view]</small>	No	<input type="checkbox"/> Use system value

In detail, the options available to you are:

- **Enabled** – activates the payment method
- **Title** – allows you to define a custom payment title. As this is a store-view level setting, you can use it for localization

- **Display Zero Fee** – if activated, will display the fee even if the calculated fee is equal to zero
- **New order status** – defines what status newly created orders should be set to after selecting this payment method
- **Payment from Applicable Countries** – allows you to restrict usage of this payment method to selected countries
 - **Payment from Specific Countries** – available if *Specific Countries* is selected; allows you to choose to which countries the order can be shipped for this method to be available
- **Minimum Order Total** – defines the minimum subtotal of the order for the payment method to be available
- **Maximum Order Total** – defines the upper limit for the subtotal above which this payment method will not be available
- **Cost calculation** – defines how the fee is calculated and what the following options mean
 - *Fixed* – the fee is fixed and equal to the defined value in the store base currency
 - *Percentage* – the defined value is a percentage rate which will be applied to the order subtotal to calculate the fee
- **Cost for inland shipping** – defines the value for the fee when shipping to an inland destination
 - **Minimal cost for inland shipping** – only available when **Cost calculation** is set to *Percentage*; this will be the fee if the calculated inland value falls below it
- **Cost for shipping to foreign countries** – defines the value for the fee when shipping abroad
 - **Minimal cost for shipping to foreign countries** – only available when **Cost calculation** is set to *Percentage*; this will be the fee if the calculated abroad value falls below it
- **Custom text for checkout page** – allows you to add an additional text to the payment method selection during checkout
- **Disallow specific shipping methods** – allows you to restrict usage of this payment method when the specified shipping methods are selected
 - **Disallowed shipping methods** – select shipping methods which will disable Cash on Delivery during payment method selection

There are additional settings in the **Sales > Tax** section of the configuration:

- **Tax Classes > Tax Class for Cash on Delivery Fee** – defines the tax class for the delivery fee
- **Calculation Settings > Cash on Delivery fee** – defines if the calculated fee already includes tax or not
- **Price Display Settings > Display Cash on Delivery Fee** – defines how the fee and its tax should be displayed

4 Usage

After configuration, Cash on delivery is available as a payment method with the chosen title:

Payment Method:

Pay on delivery

My billing and shipping address are the same

Test Customer
Imaginary Street
Wien, Wien 1030
Austria
+43123456789

Nothing will be charged now. Please have cash or a debit/credit card ready at delivery.
