

PlatonPay for Magento 2.3

«Platon Pay» is an ideal solution for online stores accepting payments from cards: Visa, Mastercard, Prostir. Easy and convenient installation and configuration of the module will allow you to set up the ability to accept online card payments on your website in a few minutes.

Module Features

By connecting this module, you will receive on your site ready-made functionality for receiving Internet payments for goods or services in your store. In addition to accepting payments by cards, the site will also have the opportunity to pay using:

- Apple Pay
- Google Pay
- VisaCheckout;
- MasterPass
- Privat24.

Platon Company (<https://platon.ua>) - tried to take into account all the wishes of customers and developed the easiest installation and configuration module for receiving payments from cards for websites.
