How to Download & Install Royal Mail Shipping with Parcelforce Worldwide Magento 2.0 Extension?

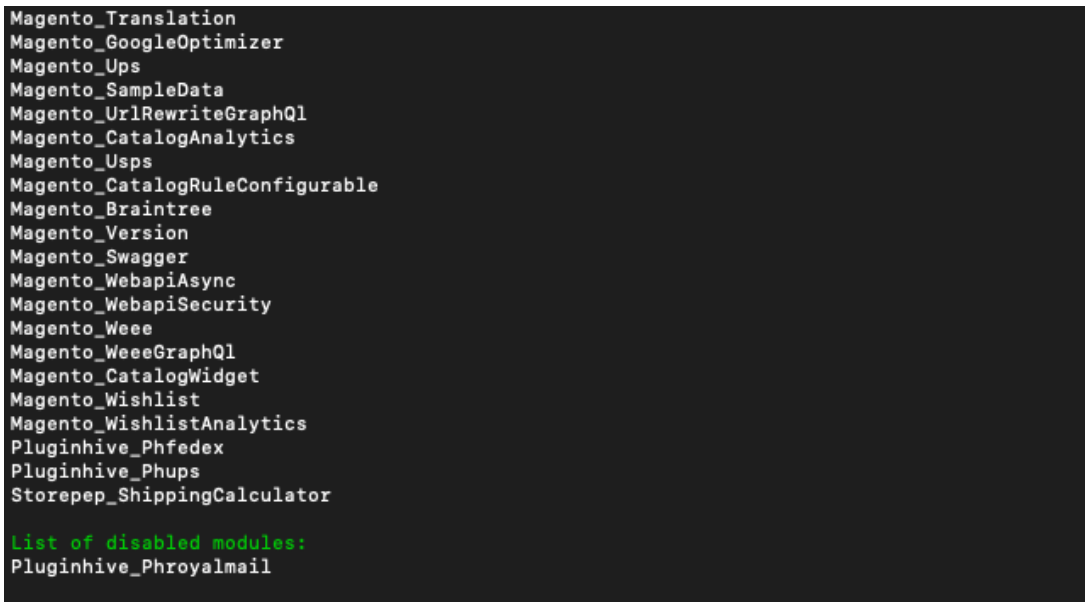
This article gives you step-by-step instructions to install Magento 2.0 Royal Mail Shipping with Parcelforce Worldwide extension.

Steps to Install the Extension:

1. Get the folder containing the extension
2. Move to the **app** folder from the Magento root. Create a folder **code** inside the **app**.
3. Copy the extension folder you into the **code** folder.
4. Login to your **SSH.** Navigate to **bin** folder from Magento root.
5. In the terminal, Run

```
./magento module:status
```

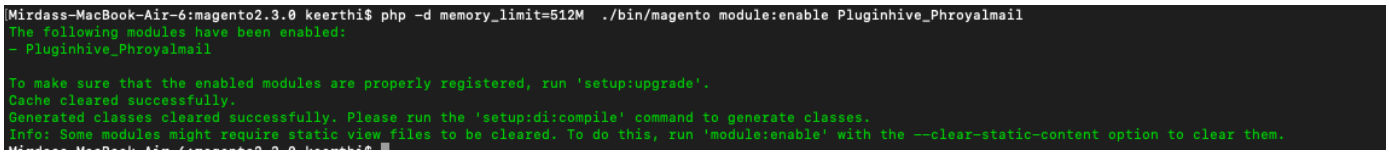
. You can see the extension under the list of disabled modules.



- Run

```
./magento module:enable module_name
```

to enable the extension.



- Run

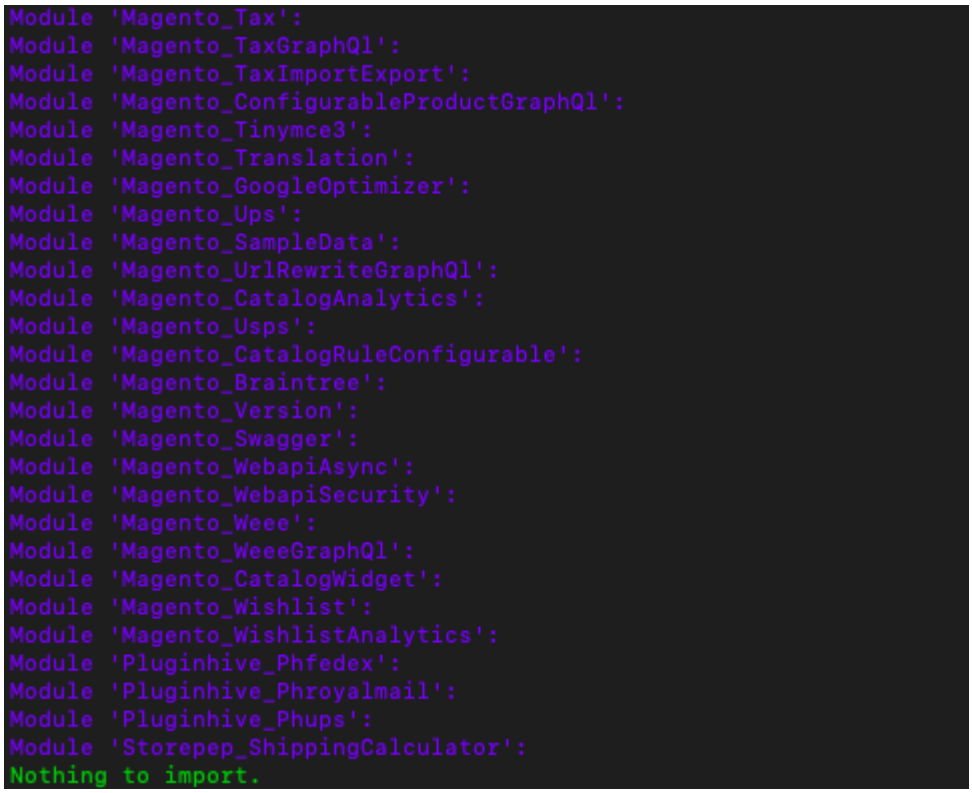
```
./magento module:status
```

to see the extension listed under enabled modules.

- Run

```
./magento setup:upgrade
```

to upgrade the extension.



- Run

```
./magento setup:di:complie
```

to finish installation

- After this, Login as Magento admin and navigate to Stores > Configuration > Sales > Shipping Methods. There you can find the newly installed UPS Shipping Rates & Labels with Tracking Magento 2.0 extension.
