

DELETE ORDER FOR MAGENTO 1

INSTALLATION GUIDE

After finishing purchasing/downloading process, I will immediately send you an email containing the link to download this extension.

Step 1:

The file you download is normally a zip file. Please unzip that file before installation.

After you unzip the file, you will see “app” folder inside it.

Now you only need to upload “**app**” to your magento root directory. After that clean your “**cache**” folder under “**var**” folder.

Step 2:

After installation the extension and if you got the 404 not found page in the admin panel then please follow below steps:-

- Go to **System -> Cache Management** and clear cache
- Log out from Admin Panel
- Log in again
