

eCommerce **Evolved**

Installation

Composer

1. Change Directory to your Magento root folder
2. Enter following commands to install module:

```
composer config repositories.radwebstripe git git@github.com:Radweb/stripe-magento2.git
composer require radweb/stripe
```

3. Wait while dependencies are updated.
4. Enter following commands to enable module:

```
php bin/magento module:enable Radweb_Stripe --clear-static-content
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento cache:flush
php bin/magento indexer:reindex
```

5. Enable and configure Stripe in Magento Admin under Stores/Configuration/Payment Methods/Stripe

SSH + FTP

1. Upload all files to app/code/Radweb/Stripe
2. SSH into root of Magento
3. Run the following commands

```
php bin/magento module:enable Radweb_Stripe --clear-static-content
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento cache:flush
php bin/magento indexer:reindex
```

4. Enable and configure Stripe in Magento Admin under Stores/Configuration/Payment Methods/Stripe

Configuration

1. Set up a Stripe account - <https://dashboard.stripe.com/register>
2. Log into admin and navigate to - Sales > Payment Methods > Stripe
3. Input Stripe Live and Test keys
4. Configure Saved Cards, Credit Card Types, New Order Status (Authorise and Capture will appear dependant on this. Default is authorise and capture). Payment Countries, min order total and max order total
5. Enable the extension
6. If in test mode and testing use the following cards - <https://stripe.com/docs/testing>
7. Use in production

Admin Settings

Enabled - This will enable and disable the module from payment level. To disable at system level please look at the uninstall section

Title - The modules title displayed on the checkout, admin order and sales emails

Test publishable and test secret key - Stripe keys that are used when module is in test mode

Live publishable and live secret key - Stripe keys that are used when module is in live mode

Stripe live mode -

No - Only test cards may be used to test the module, payments will be visible within the test area of your Stripe dashboard

Yes - Only actual cards may be used for real world payments, accounts will be charged, payments will be visible within the live area of your Stripe dashboard

Enable saved cards - Allow customers to save their cards for later use

Credit card types - What card types may be used at checkout

Authorise and Capture - Authorise will not charge the customer or create an invoice, you have 24 hours to manually invoice before Stripe disposes the payment. Authorise and capture will invoice there and then.

Sort order - Display priority at check out

Payment from applicable countries - specific, you will need to choose from "Payment from Specific Countries" for what countries will load the checkout. Or select all allowed countries to load the payment module for all accepted countries

Min order total - Minimum amount for the module to display

Max order total - Cut off amount for module to display

Disable and Uninstall
