

# PagSeguro Transparent for Magento 2.3+

## Installation Guide

## Disclaimer

---

This module is a personal initiative from the developer Ricardo Martins, which is not related to PagSeguro company. PagSeguro is a brand owned by UOL Internet.

## Install Instructions

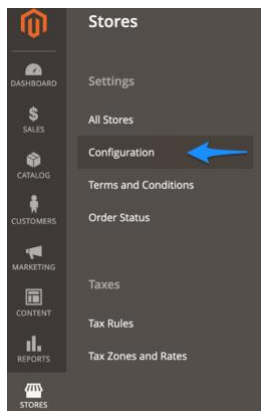

---

### Installing via composer

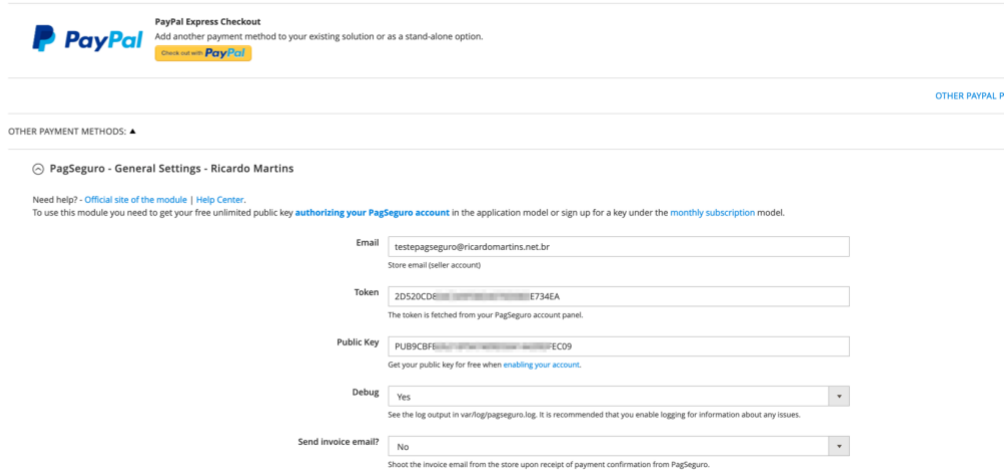

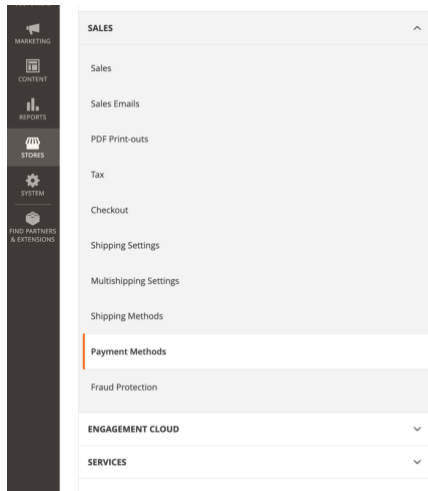

1. Open your terminal
2. In your magento root folder type `composer require ricardomartins/pageseguro`
3. Then type `bin/magento setup:upgrade`
4. Then type `bin/magento setup:di:compile`
5. If your store is in production mode or you don't know if it is, type `bin/magento setup:static-content:deploy`.

### Main Settings (Credentials)

Login to your Magento admin and navigate to Stores > Configuration

Then go to Sales > Payment methods and locate “PagSeguro – General Settings – Ricardo Martins”.

In this step you'll need to configure the following fields:

- **E-mail** – type your Pagseguro account e-mail address. You must have a Business or Seller account. If you don't have one, sign up at [www.pagseguro.com.br](http://www.pagseguro.com.br)
- **Token** – PagSeguro token is obtained at your PagSeguro Dashboard and contains 32 or 100 characters. This field may not be present in future versions.
- **Public Key** – You'll get this after authorizing the application with your PagSeguro account. This can be done at <https://pagseguro.ricardomartins.net.br/magento2/wizard.html> (Step 1). The Public Key is sent via e-mail and also displayed in the last step.

## Enabling payment methods

Under the same page (Payment Methods) you'll find configuration related to accepting payments with Credit Card, Boletto, TEF, Redirect (which enables PIX, PagSeguro Balance, etc), and Two Credit Card Payments.

Every configuration group from this module has a suffix “ – Ricardo Martins”.

Every payment method configuration is located under a different group. You just need to enable it under the “Enable” option. For example:

### ⊖ PagSeguro - Credit Card - Ricardo Martins

 Enabled

Title

New Order Status

Card Brand Size

Exemplos:

## Saving settings

After saving your settings, you may need to flush your caches. This can be done by typing `bin/magento cache:flush` in your terminal, or in your Magento dashboard under System > Tools/Cache Management.

# Uninstall or Disable

---

To uninstall the module, just remove all the added files. This module does not add any attribute to your Magento.

You can also disable the module under Store -> Configuration -> Sales -> Payment Methods, and disable all payment methods that the module added, identified with the suffix “- Ricardo Martins”.

If you used composer to install it, just type

```
composer remove ricardomartins/pagseguro
```

# Knowledge Database

---

You can find a knowledge database with the most common questions and troubleshooting information under <https://pagsegurotransparente.zendesk.com/hc/pt-br>

It's available only in Portuguese.

**Você está na Central de Ajuda das integrações PagSeguro para Magento e WooCommerce.**
