

Best Selling Products

Overview

Best Selling Products extension for Magento 2 has been developed by the product team at RLTSquare. This extension displays your best selling products on the home page and other pages that you want so customers can view and easily buy them if they want.

We have implemented AJAX Lazy Load on the slider to decrease the page load time of the website and to fetch only those images or thumbnails from the database that fits on the screen size of the webpage. We can exclude or include out of stock products. Our extension provides many options for settings in the admin panel.

Hence, not only does this extension help boost your shop's sales, but also makes it easy for your customers to immediately see those products that everyone is buying.

Features

- Shows the best selling products in your store
- Apply AJAX Lazy Load on slider where all the products are displayed
- Visible on Home, Product and Category Page
- Exclude or include out of stock products from the slider
- Effectively display bestseller products in the slider or grid layout.
- You can set best seller products limit

Installation

1. Run following command:

```
composer require rltsquare/best-seller
```

2. Wait while composer is updated.

3. Enter following commands to enable the module:

```
php bin/magento module:enable RLTSquare_BestSeller
```

```
php bin/magento setup:upgrade
```

```
php bin/magento cache:clean
```

```
php bin/magento cache:flush
```

4. If Magento® is running in production mode, deploy static content and then clear the cache:

```
php bin/magento setup:static-content:deploy
```

This extension for Magento® works on Magento 2.2 and 2.3 versions. Tested on versions 2.2.5 and above.

Troubleshooting

After placing the order please follow the mentioned steps:

1. In Menu Bar navigate to Reports.
2. In “Reports” under “STATISTICS” click on “REFRESH STATISTICS”
3. Check all options available and click on the submit button.
4. Flush Magento Cache.

NOTE:

REFER TO SCREENSHOTS FOR FURTHER ELABORATION.

Here are the print screens:

This screenshot shows the Magento Configuration interface for the 'Best Seller' feature. At the top, a yellow banner displays a warning: 'One or more of the Cache Types are invalidated: Configuration, Page Cache. Please go to Cache Management and refresh cache types.' The page title is 'Configuration' and the user is logged in as 'admin123'. The 'Store View' is set to 'Default Config'. A 'Save Config' button is visible in the top right. On the left, a sidebar contains navigation menus for GENERAL, CATALOG, CUSTOMERS, SALES, BEST SELLER, DOTMAILER, SERVICES, and ADVANCED. The 'BEST SELLER' menu is expanded, showing a 'Settings' section. The main content area shows the 'Enable' setting for 'Best Seller' is currently set to 'No'.

This screenshot shows the same Magento Configuration page for 'Best Seller', but with the 'Enable' setting set to 'Yes'. The yellow warning banner is still present. The 'Enable' dropdown is now set to 'Yes'. Below it, the 'Exclude Out of Stock' setting is set to 'No', and the 'Products Display' setting is set to '10'. The 'Visibility' section is expanded, showing a list of page types: 'Product Page', 'Category Page', and 'Home Page'. The 'Save Config' button remains in the top right. The sidebar and footer information are consistent with the previous screenshot.
