

Magento 2.x Extension

Introduction

Route has developed a Magento Extension that adds secure shipping protection to your orders. The extension has been tested on **Magento 2.0, 2.1, 2.2 and 2.3**.

If you are having issues with our extension please reach out to our customer support. Click here (<https://help.route.com/hc/en-us>) to get help.

The Route Shipping Protection option simply sits on your checkout page, adding a layer of 3rd party trust to your site while improving your customer's shopping experience.

Route instantly protects your store, and your customers, while covering losses, keeping more revenue in your pocket and making your customers happy.

Installation

Magento Marketplace

After purchasing our extension from Magento Marketplace, copy the component name of our extension in the [My Purchases](#) page.

Currently: *route/route-m2*

Make sure you have your [composer set up](#) with your access key provided by Magento Marketplace.

In your project root folder run the following command to install our extension:

composer require "route/route-m2"

You should see the following output:

```
home@localhost:/var/www/magento_root_folder$ composer require "route/route-m2"
Using version ^1.0 for route/route-m2
./composer.json has been updated
Loading composer repositories with package information
Updating dependencies (including require-dev)
Package operations: 1 install, 0 updates, 0 removals
 - Installing route/route-m2 (1.0.5): Downloading (100%)
Writing lock file
Generating autoload files
```

Run the *bin/magento setup:upgrade* command, and you should see the following:

```
home@localhost:/var/www/magento_root_folder$ bin/magento setup:upgrade
Cache cleared successfully
File system cleanup:
/var/www/magento_root_folder/generated/code/Composer
/var/www/magento_root_folder/generated/code/Magento
/var/www/magento_root_folder/generated/code/Symfony
/var/www/magento_root_folder/pub/static/depoyed_version.txt
/var/www/magento_root_folder/pub/static/frontend
/var/www/magento_root_folder/var/view_preprocessed/pub

Module 'Route_Route':
Nothing to import.
```

Route has been successfully installed.

Plug Configuration

After plugin installation, go to the Magento Admin side and navigate to **System -> Cache Management**. Click on **Flush Magento Cache**.

Cache Management

Flush Cache Storage **Flush Magento Cache**

Refresh Submit 14 records found

<input type="checkbox"/>	Cache Type	Description	Tags	Status
<input type="checkbox"/>	Configuration	Various XML configurations that were collected across modules and merged	CONFIG	ENABLED
<input type="checkbox"/>	Layouts	Layout building instructions	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/>	Blocks HTML output	Page blocks HTML	BLOCK_HTML	ENABLED
<input type="checkbox"/>	Collections Data	Collection data files	COLLECTION_DATA	ENABLED

After you clear the cache, sign out and sign in back to the admin.

Tokens

The tokens should be completed automatically after you done the onboarding on the Route account. You will be redirected to the onboarding flow the first time you enter into your admin page after installing the Route module.

You should have received the tokens from our team. A public token and a secret token.

The public token is used to calculate the insurance amount on your checkout page.

The secret token is used to send the order and shipping information to Route's API.

To check the tokens, navigate to **Stores -> Configuration -> Route -> Integration Setup**

The screenshot shows the 'Configuration' page in the Route admin interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, and Reports. The main content area is titled 'Configuration' and includes a search icon. Below the title, there is a 'Scope' dropdown set to 'Default Config'. A left-hand menu lists configuration categories: GENERAL, CATALOG, SECURITY, CUSTOMERS, and ROUTE. The 'ROUTE' category is expanded to show 'General Options'. In this section, the 'Enable Route Extension' is set to 'Enable'. Below this, the 'Public Token' is displayed as '88[REDACTED]0e1' with a note: 'Don't have an account? Please [click here](#) to create one.' The 'Secret Token' is displayed as 'c0[REDACTED]0b'.

Order Confirmation

You can check if an order was placed using Route Insurance by navigating to **Sales -> Orders** and then selecting a specific order.

If an order was placed adding Route, you will see the fee added to the order summary.

Also, you will see on the Orders grid that there is a new row added to show if the order is Route protected or not, and another one with the protection amount.

ID	Purchase Point	Purchase Date	Bill-to Name	Ship-to Name	Grand Total (Base)	Grand Total (Purchased)	Status	Action	Allocated sources	Signifyd Guarantee Decision	Route Charge	Route Insurance
210312000021	Main Website	Mar 12, 2021 9:24:09 PM	John Doe	John Doe	\$59.98	\$59.98	Pending	View			\$0.98	Yes

Order Totals

Subtotal	\$59.00
Shipping & Handling	\$0.00
Route Shipping Protection	\$0.98
Grand Total	\$59.98
Total Paid	\$0.00
Total Refunded	\$0.00
Total Due	\$59.98

Widget Block/Shortcode

Route provides a widget block/shortcode in the case your store uses a custom checkout system, or if you need to place the Route checkbox in another page such as a slide cart.

CMS / HTML

When editing the page in the CMS, you can add the Route Widget by adding the following block code:

```
{{widget type='Route\Route\Block\Widget\Widget' type_name='RouteWidget'}}
```

This code will render the Route checkbox wherever you add it.

PHP

You can also render the checkbox in any PHP/PHTML file. You can add the following code to your file:

```
<?php echo  
$this->getLayout()->createBlock('Route\Route\Block\Widget\Widget')->toH  
tml(); ?>
```

Thank you.
