

How to install Salesfire

1. Add Salesfire to your Magento account
(<https://marketplace.magento.com/salesfire-magento2.html>)
2. Navigate to the Extension Manager within your store admin (System > Web Setup Wizard > Extension Manager)
3. Refresh then navigate to Review and Install.
4. Install salesfire/magento2 (Version 1.2.15)
5. Continue to setup.

How to setup Salesfire

After installing you will need to enter your Salesfire details by following the steps below:

1. Navigate to the store configuration (Stores > Configuration)
2. Navigate to the Salesfire settings (Salesfire > General)
3. In the action bar change the scope to the Store View you want to configure Salesfire on.

4. Populate the Site ID (This can be found within your Salesfire admin)
5. Mark enabled as Yes.
6. Done.
