

## User Guide

---

Once you successfully install the extension, below are the steps to configure it from the admin panel.

Using the Currency Rate Updater extension, you can update the currency rate using cron and manually.

### 1) Steps to update the currency rate using a cron job.

---

**Login to the admin panel => Go to Stores => Configurations => General => Currency Setup => Scheduled Import Settings**

Enable this setting and select the **"Custom Currency Updater"** option from the drop-down.

Then, set the **"Error Email Recipient"** on which you will get an email in case the currency rate is not updated using a cron job.

See the below screenshot of configurations and once you configure, save the setting and flush the cache.

The screenshot shows the 'Scheduled Import Settings' configuration page. It includes the following fields and options:

- Enabled** (store view): A dropdown menu set to 'Yes'. To its right is an unchecked checkbox labeled 'Use system value'.
- Service** (store view): A dropdown menu set to 'Custom Currency Updater'.
- Start Time** (store view): A time picker set to 00:00:00.
- Frequency** (store view): A dropdown menu set to 'Daily'.
- Error Email Recipient** (store view): A text input field containing 'er.sanjaygohil@gmail.com'.
- Error Email Sender** (website): A dropdown menu set to 'General Contact'. To its right is a checked checkbox labeled 'Use system value'.
- Error Email Template** (website): A dropdown menu set to 'Currency Update Warnings (Default)'. To its right is a checked checkbox labeled 'Use system value'.

Below the 'Error Email Template' field, there is a small note: 'Email template chosen based on theme fallback when "Default" option is selected.'

### 2) Steps to update the currency rate manually (not using a cron job)

---

**Login to the admin panel => Go to Stores => Currency Rates**

Here, from the "Import Service" dropdown select the "Custom Currency Updater" option and press the "Import" button as you can see the price rate is fetched from the API then Save the Rate.

See the below screenshot.
