

+-----+
| INSTALLATION STEPS |
+-----+

Thank you for your order. The installation steps are described below.

1. The zipped file contains an app/ folder. Please unzip and copy this app folder into your Magento root directory (that is the folder where the app/ folder is located).

There will already be an app/ folder in your Magento root. Not to worry, copying over this will not overwrite any existing files.

It will just ensure that the module files are copied into the correct directories.

2. Now, you can see the payment module when you login into your Magento Admin and go to, System > Configuration > Payment Methods

3. Enable the module and configure it.

4. Clear your Magento cache and if, compilation is enabled re-compile the files.

Configuration Steps:

To configure this module you will need the Payeezy API Key, API Secret and Merchant Token.

To get these credentials first, login into your First Data Payeezy account.

- The API Key, API Secret and Merchant Token can be found under MY APIS Menu >> YOUR ACCOUNT >> KEYS Tab.

- Merchant reference code ñ used by Payeezy system will be reflected in your settlement records and webhook notifications.

It is an "optional" field

- Payeezy URLs

Sandbox Account

<https://api-cert.payeezy.com/v1/transactions>

Live Account

<https://api.payeezy.com/v1/transactions>

That's it!

In case this is not working for you please contact us with the sFTP details and

Magento Admin details and we will test your server parameters and install it for you in 24 to 48 hours.
