

Admin Activity Login -

Installation/Set-up guide For Magento 2

1. **Upload Package:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added.
2. **Install extension:** After the successful upload of the package you have to run the commands on Magento2 root directory via SSH

```
“php bin/magento setup:upgrade”  
“php bin/magento setup:static-content:deploy”
```

3. **Clear Caches:** This can be done from the admin console by navigating to the cache management page (System->Cache Management), selecting all caches, clicking 'refresh' from the drop-down menu, and submitting the change. Logout and login back in Admin.
