

# SELLO CHANNELCONNECTOR

Version 2.0.0

Magento 2.4

Table of Contents

**Statement:.....3**  
**Requirements: .....3**  
**Setup:.....4**

### Statement:

This module is not bug free, but we are working hard to find and fix any bugs that are reported to us. You can report any problems or questions to [support@sello.io](mailto:support@sello.io), and we will help you as soon as we can.

In this initial release so are you required to create a Sello account before starting to use the module. In a future release so will we enable the creation of an account during the OAuth authentication process.

### Requirements:

- Magento 2.4
- A Sello account, register here: <https://sello.io/register>

## Setup:

When the module is installed into Magento, a new OAuth integration will be created automatically.

Go to System -> Extensions -> Integrations and Activate the integration.

### Integrations

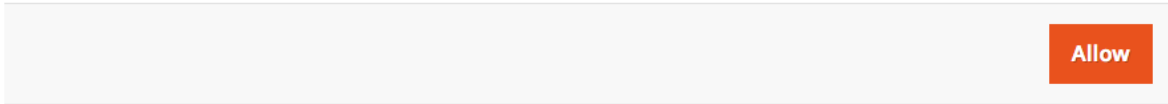

Search Reset Filter 1 records found 20 per page 1 of 1

Name	Status			
ChannelConnector	Inactive	Activate	i	🗑️

Image 1 Integration settings page

When the integration is activated, it will ask for permissions to create orders and getting product information. These permissions are necessary to create orders in Magento when an order comes in from a channel.

## ChannelConnector

The integration you selected asks you to approve access to the following:

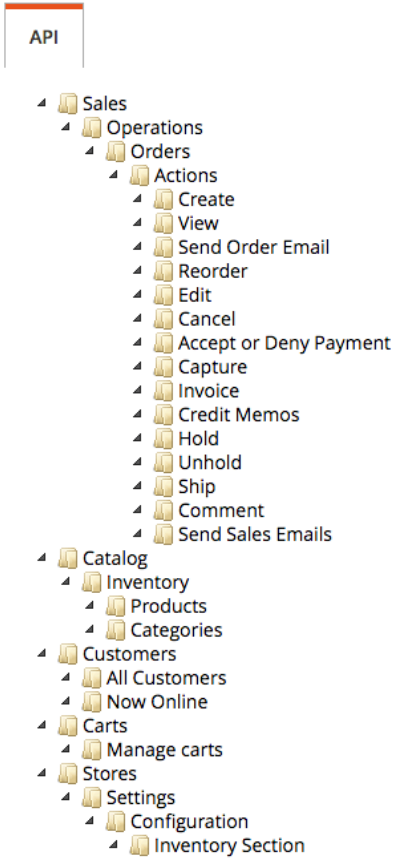

Image 2 Integration permissions

After allowing the integration the specified permissions, you will be requested to login to your Sello account, this is to connect your installation with Sello. So the module later can fetch data from and send product updates to ChannelConnector.

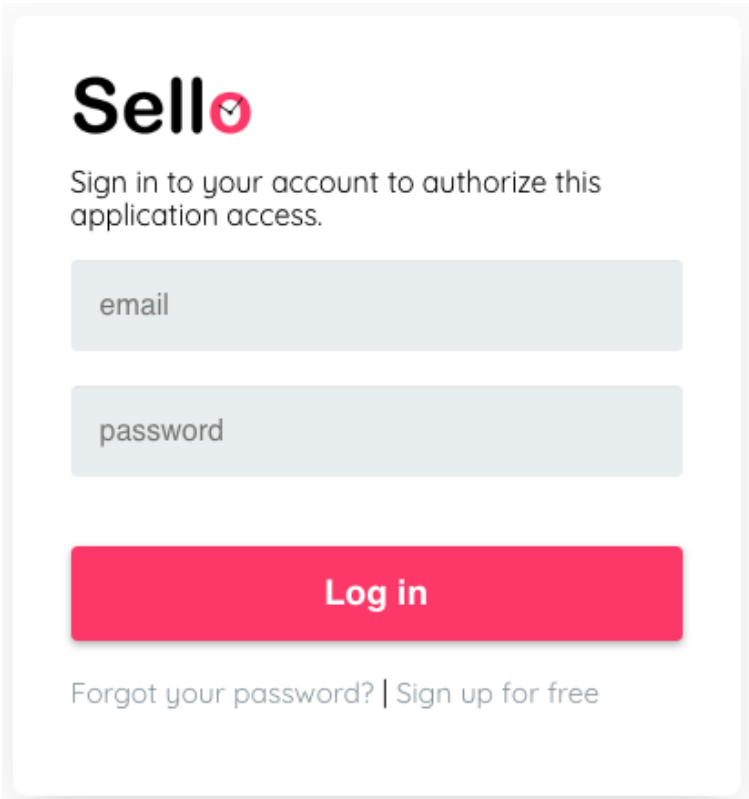

Image 3 Login form

If you have MFA activated on your Sello account, then you will also have to authenticate that as well.

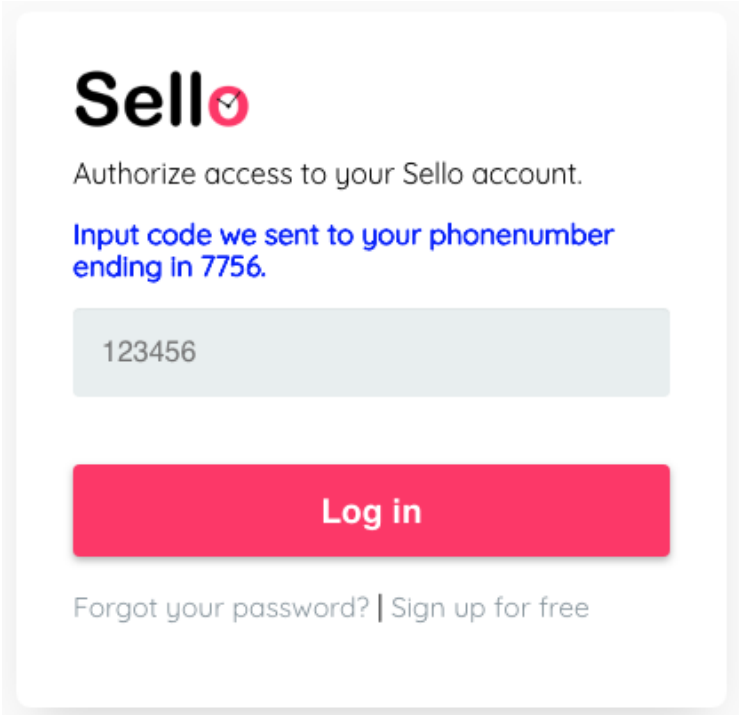

Image 4 MFA login form

After your Sello account have been authenticated, you are all good to go!
