

# SendCloud Magento Extension

Magento is one of the most used E-commerce systems worldwide! SendCloud has created a plug & play integration with the Magento V1 environment.

Benefits for your shop:

- Import & print shipping labels
- Get access to the SendCloud location picker: The complete Parcelshop picker for your customer
- See you the status of your shipments in your Magento & SendCloud environment

## 1. Go to Magento Connect

Go to [Magento Connect](#) and click the *Install Now* button to get your Extension Key:

The screenshot shows the Magento Connect interface for the SendCloud Integration extension. At the top, there is a navigation bar with the Magento Connect logo, a search bar for extensions, a dropdown for 'All Platforms', and a 'MY ACCOUNT' link. Below this is a category menu with options like 'CUSTOMER EXPERIENCE', 'SITE MANAGEMENT', 'INTEGRATIONS', 'MARKETING', 'UTILITIES', 'THEMES', and 'MAGENTO 2.0'. The main content area features a large blue icon representing shipping (a truck, a box, and a cloud). To the right of the icon, the extension title 'SendCloud Integration' is displayed, along with a 5-star rating, a 'Write the first review' button, and a '2 Popularity Score' indicator. Below the rating is a 'Follow this extension' link. The description states: 'SendCloud is the Smart Shipping Tool for E-Commerce. Connect DHL, UPS, PostNL, DPD and many others to Magento.' A compatibility list is provided: 'Compatible with: 1.5, 1.6, 1.6.1, 1.6.2.0, 1.7, 1.8, 1.8.1, 1.9, 1.9.1, 1.9.2'. A dropdown menu shows 'Platform: Community'. The price is listed as 'FREE', and a prominent blue 'Install Now' button is visible.

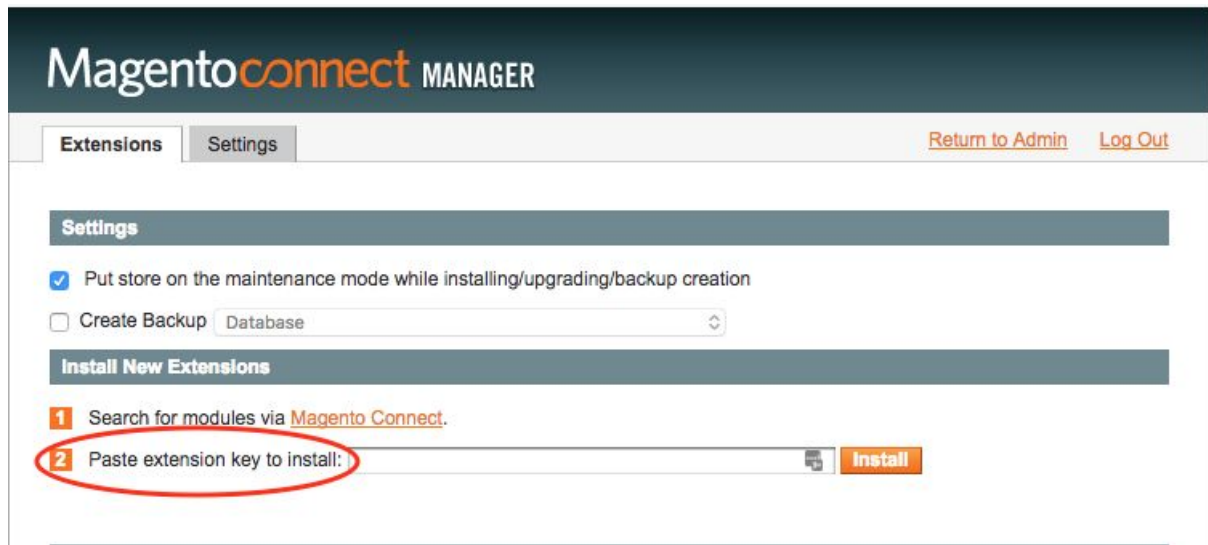

You may either login or create a new account on Magento Connect. For more information, please refer to the [official Magento documentation](#).
