

Step 1: Go to 'Find Partners & Extensions'

Step 2: Search for 'SendCloud' and install the module.

Step 3: When the module is installed, go to 'Stores > Sales', where you can click on 'SendCloud'. Set 'enable' to 'yes'

Step 5: Then press 'Connect to SendCloud', and you'll be redirected to your SendCloud account, where you can log-in.

Set-up Service points:

Step 1: To enable service points, you first have to log into your SendCloud account, and go to: 'Settings > Connected shops'. Here you've added your Magento integration. Click on the pencil to edit the integration settings. You next see the option 'service points', which you can enable.

Step 2: Select the carrier which you want to show in the location picker in your checkout.

Step 3: Next step is to activate the shipping method for in your checkout. Go in Magento to 'Stores > Shipping Methods' and enable the SendCloud method.
