1. Introduction

Admin Activity Logger extension enables you to track all the activities made by admin users in the backend with all details of activities performed.

When several admin users have the access to your online store backend. It's highly important to be fully informed you of all the actions performed by you and other admin users at the right time. The Admin Activity Logger extension allows you to record all the activities made by store administrators in a backend.

You can efficiently monitor the activities of your admin users and can have a good idea, about their performance. This extension helps you to track what and when was created, edited, deleted and who is responsible for that action. Additionally, you can establish the control over a specific action of the required admin users. It helps you to take appropriate action accordingly for the improvement of your online store.

Admin Activity Logger extension records all backend logins with status successful or failed. This extension allows you to have details like date, admin name, action type (creation, deletion, or editing) of all the actions of every admin user who have a backend access. This will automatically clean the log records after the specified number of days. It also consists with advanced backend configuration to export log records info in XML/CSV file.

Features

- View the status of every login attempt i.e. Successful or Failed
- You can also easily filter all login attempts by dates
- Log actions of all or specific admin users
- Record the specific action groups i.e. products, category, sales, etc.
- View all the recorded actions on a special grid. You can check the following information:
 - The date when an action was performed
 - The person who has performed the action
 - The type of the action e.g. creation, deletion or editing
 - Which object in was affected
 - The item which has been changed
- You can set the time period after which the logs are deleted
- Export log records info in XML/CSV file

2. Extension Configuration

▲ Enter 0 to disable cleaning

Enable / Disable extension from here

Select Users for which you want to save action log

Enter number of days for clean logs after entered days

System > Configuration > SETUBRIDGE

3. Backend – Admin Activity Logger

The screenshot shows the Admin Activity Logger interface. At the top, there is a navigation bar with tabs for Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, System, and Admin Activity Logger. Below the navigation bar, there is a message bar with a "Latest Message" about a webinar. The main content area is titled "Admin Action Log" and includes a "Clear Log" button. Below the title, there are pagination controls (Page 1 of 1 pages, View 20 per page, Total 3 records found), an "Export to" dropdown menu set to CSV, and buttons for "Export", "Reset Filter", and "Search". The main table has columns for "Created At", "User Name", "Action Name", "Item", "Object", and "View Changes". Three callouts point to the "User Name", "Action Name", and "Item" columns, explaining their content.
