1. Introduction

Advance Quick Order extension is specially designed to reduce placing order steps and allowing wholesaler customers to add and purchase products quickly. These allow customers to purchase products quickly via a popup and make whole checkout process speedy & reduce customer's valuable time in purchasing. The wholesaler customer can also add multiple products to cart by SKU in one click action. Yes, it does exactly the same thing instantly by suggesting items when someone types a few SKU letters, admin can also manage quick order form position, animation, auto search character limit, link-button label etc. can be customizable from backend admin panel.

Advance Quick Order extension let's store owners to enhance the overall shopping experience and increase customer satisfaction as well as loyalty.

Features

- Popup to show quick order form on all pages
- Automatically suggest item by typing a few SKU
- One click action to add multiple simple products in shopping cart
- Add new line button so the customer can add additional fields as needed
- Limit the number of results shown in list from admin panel
- Auto search character limit, result item count, default visible text-boxes in quick form etc. all can be configured from admin panel
- CSV import feature to add to cart bunch of SKUs
- Quick Order form position, animation & link-button label, all can be customizable from admin panel
- No coding skills required to make it live

Note: currently we support only simple products without custom options.
