1. Introduction

Advance Quick Order extension allows the customers to add multiple products SKUs to the cart directly from a single screen.

If a customer is buying products in bulk, they don't want to browse through a hierarchy of categories. Most of the eCommerce platforms make adding an item to the cart a multi-step process. Normally, with the default of Magento, customers cannot search by SKU or import CSV file.

The Advance Quick Order extension is specially designed to reduce the number of steps it takes to place an order and allows wholesale customers to add products quickly. It provides the most convenient steps for a wholesaler to place orders with an autocomplete search box, it displays the auto-suggestions. When a customer enters the product's SKU into the field which helps to pick-up items instantly. Additionally, this allows wholesale customers to import CSV file to add to cart bunch of SKUs. Also, the store owner can display various data about their products including a name, SKU, price, quantity and subtotal.

The Advance Quick Order extension will also enhance the overall shopping experience for your customer by adding a simple, intuitive way to purchase any of your products.

Features

- **Allows adding multiple simple products** by just one click action in shopping cart
- **Quick Order form interface enables** adding multiple products by their SKU
- **Ease of use** increases customer satisfaction as well as loyalty
- **Auto suggestion of product's SKUs** reduces the possibility of human error
- **CSV import feature** enables adding many products to the cart based on their SKU's
- **Enables customization of position, animation & link-button label** in the Quick Order form
- **Enables customization of auto search character limit, result item count, default visible text-boxes** in the Quick Order form

Note: Currently, we support only simple products without custom options.

2. Extension Configuration

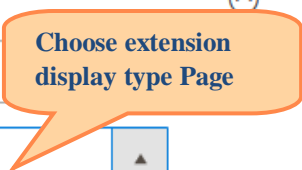

STORES > Configuration > SETUBRIDGE > Advanced Quick Order

The screenshot shows the configuration interface for the 'Advanced Quick Order' extension. The breadcrumb path is 'STORES > Configuration > SETUBRIDGE > Advanced Quick Order'. The page is titled 'General' and includes a 'Save Config' button. The configuration is organized into sections: GENERAL, CATALOG, CUSTOMERS, SALES, SERVICES, and ADVANCED. The following table summarizes the visible configuration options and their values, with callouts explaining key settings:
