INTENDED AUDIENCE

The content of this document is designed to facilitate the users - managers, supervisors and others of **Notification Bar Text on the Home Page** Extension for @Magento 2.

A step by step instruction has been added to this document to help users to install the extension on @Magento 2.

This extension will only work on @Magento 2. As a safe practice always backup your files and database before installing any extension on @Magento.

The extension works without making any change in the existing @Magento files so that existing customization and theme change do not affect. We provide free technical and feature support in installation, configuration, as well as access to updates available for this extension. Get in contact with us for support work.

USER GUIDE

We need to Login to admin panel and flush @Magento cache storage after successful installation of the extension as per installation guide. We need to logout and login again to see updated menu option for the module.

We can see how to configure and use the extension with demo data on demo instance.

HOW TO CONFIGURE THE EXTENSION

We will follow below steps in extension configuration.

Step 1 : We need to login admin panel using details , we can check how extension configured and used in demo instance as well. We need to visit below admin menu option to check the extension.

Marketing => User Content => Manage Notification Bar Text

Below screen-shot helps to understand the step 1.

The screenshot displays the Magento Admin Panel interface. On the left, a dark sidebar menu is open, showing the 'Marketing' section. Under 'Marketing', the 'User Content' sub-menu is expanded, and 'Manage Notification Bar Text' is highlighted. The main content area shows a table with one record. The table has columns for 'Status' and 'Date'. The record shows 'Enable' status and a date of 'Nov 21, 2019'. At the top right of the table, there is a red 'Add New Record' button. The bottom of the page shows the Magento version '2.0.18' and a link to 'Report Bugs'.

Status	Date
Enable	Nov 21, 2019

Step 2: We will be adding new record from the admin panel to see notification text bar on the home page. Once we see the module listing page, we need to click on "Add New Record " from the top right side of the page.

Below screenshots helps to understand the step 2.

NOTIFICATION BAR TEXT MANAGEMENT

Notification Bar Text Details

Title *

NOTIFICATION BAR TEXT MANAGEMENT

Enter the title of the sidebar record.

Notification Information Text *

Welcome to Our Online Store Website! We Have Useful Products In Different Categories. We Have 30% Off Offer On Products In Categories Cars, Mobiles, Laptops, PC, Cosmetic, Clothes, Crockery, Cakes, Fashion, Gift Items, Game Cards And Health Care.

The text will be shown in notification bar on the home page

Choose text css style in notification bar

Info

The text css style helps to manage background color and text color of the popup.

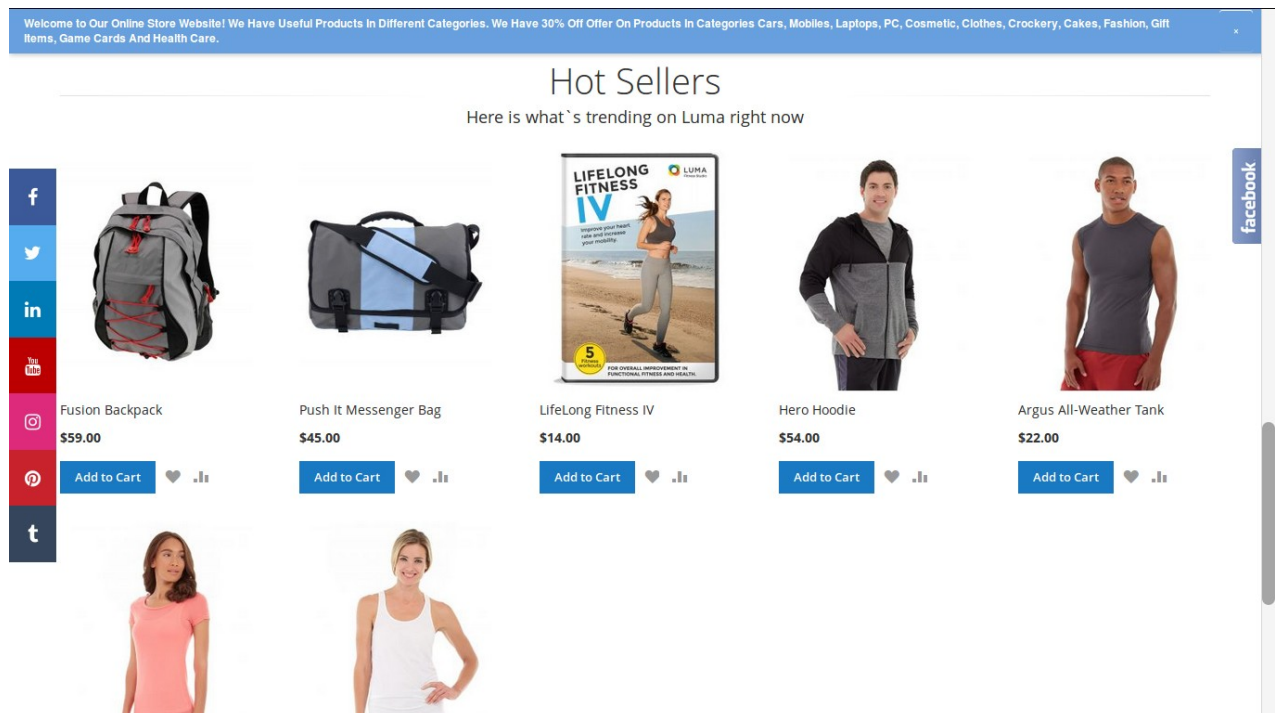

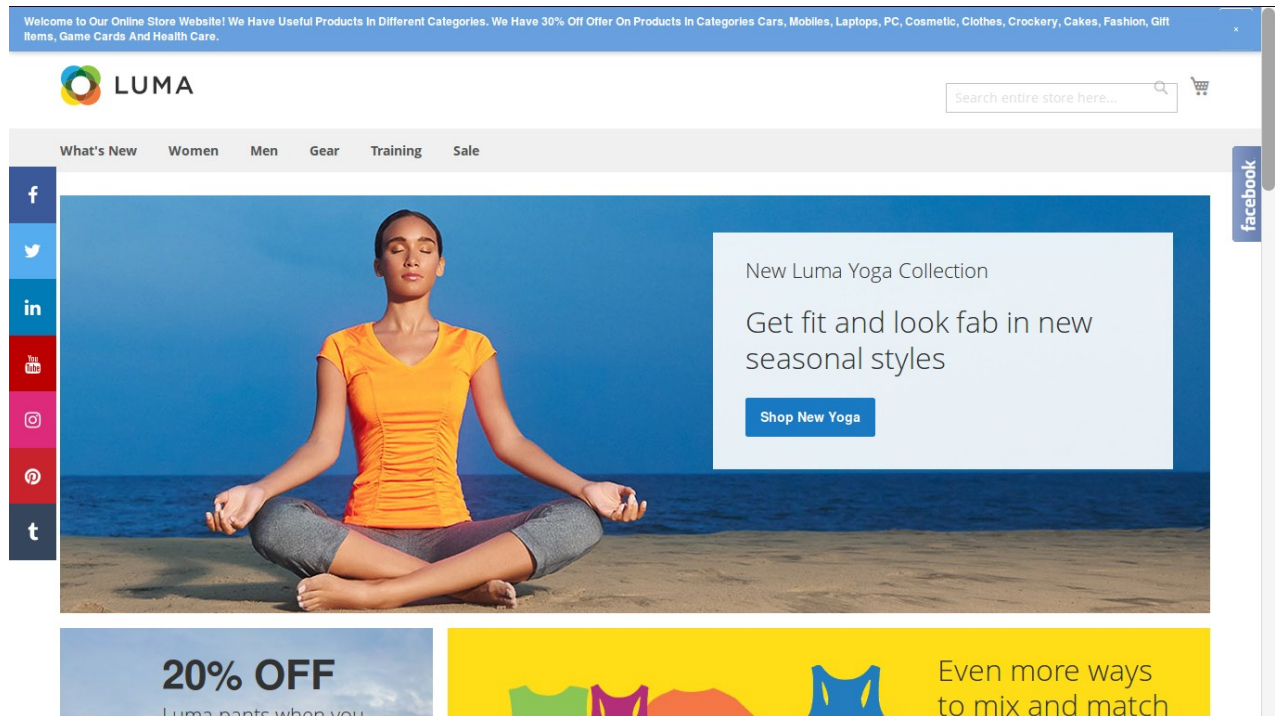

Status *

Enable

The record is Active or Inactive. Enable or disable notification bar on the home page.

Step 4: Once we have added information from admin panel and saved the record successfully. We need to visit the home page of the @Magento online store to check the notification bar text. The color of the bar depends upon the css style chosen from the drop-down option from module management page in the admin panel

Below screenshot helps to understand step 4.
