

# ShipperHQ Address Auto-Complete

Add address lookup to your Magento 2 site using the simple tool, harnessing Google's Address Auto-Complete API.

You do not need a ShipperHQ account to use this extension. For more information on ShipperHQ capabilities are available at [ShipperHQ](#)

## Facts

- [extension on GitHub](#)

## Description

ShipperHQ Address Auto-Complete will install a simple extension in Magento 2. No ShipperHQ account is necessary and it's free to use.

The extension features address auto-complete for:

1. Guest checkout support for entering shipping address
2. Logged in customer entering a new address in their address book
3. Logged in customer entering a new shipping address at checkout

You will need a Google API key that has been enabled with “Google Places API Web Service” access

## Compatibility

- Magento  $\geq$  2.3

## Installation Instructions

Install using composer by adding to your composer file using commands:

1. `composer require shipperhq/module-address-autocomplete`
2. `composer update`
3. `bin/magento setup:upgrade`

We recommend you also install our logging module

1. `composer require shipperhq/module-logger`
2. `composer update`
3. `bin/magento setup:upgrade`

Further information is available from [our help documentation](#)

## Configuration Instructions

1. Once installed, go to Stores > Configuration > Sales > Shipping Settings
2. Open ShipperHQ Address Autocomplete tab and enable the extension
3. Enter your Google API key – if you do not have a key, please register and ensure you have enabled the Google Places API services on your [Google account](#)
4. Save the configuration
5. Refresh the cache in Magento from System > Cache Management

Further information is available from [our help documentation](#)

## Limitations

1. No support for address autocomplete on any admin forms
2. No support for address autocomplete on the billing address

## Support

If you have any issues with this extension, open an issue on [GitHub](#). Alternatively you can contact us via email at [support@shipperhq.com](mailto:support@shipperhq.com) or via our website <https://shipperhq.com/contact>

## Contribution

Any contribution is highly appreciated. The best way to contribute code is to open a [pull request on GitHub](#).
