

How to: Integrate Magento 2 with ShippingEasy

Follow

Created: July 05, 2016 10:28 | Updated: June 14, 2018 13:57

IMPORTANT: this document outlines the process to integrate Magento 2.1 and 2.2 with ShippingEasy. ShippingEasy recommends a minimum version of 2.1.3 to ensure that order status updates work properly with split orders. We support up to Magento 2.2.2.

If you have a Magento v2.0.x installation, please upgrade to v2.1.3 or higher for best results with ShippingEasy.

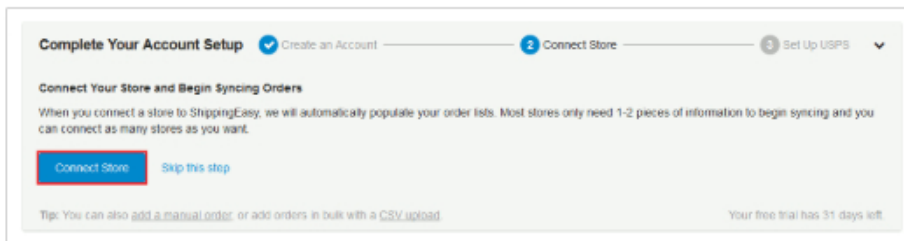

If you have a Magento v1.x installation, [click here for alternate integration steps](#).

Magento 2 is a popular eCommerce solution. Whether you're brand new to ShippingEasy or have an existing account, it's easy to integrate your Magento 2 store with ShippingEasy!

Use this guide to connect your Magento 2 store with ShippingEasy.

If you are setting up a ShippingEasy account for the first time

1. When setting up a new ShippingEasy account, you will see an Account Setup progress bar. Click the blue button to **Connect store**.

2. This will navigate you to the INTEGRATION page. From the **Platform** drop down menu, select **Magento 2**.

3. Within the **Magento 2 Store Url** field, type your store's full web address. Ex: <http://www.myshop.com>

* **Magento 2 Store Url**

ShippingEasy supports Magento 2 stores with version 2.1.0 and higher.

4. In the **Magento 2 Username** field, enter your Magento admin username. Then enter your admin password into the **Magento 2 Password** field.

NOTE: the user must have administrative permissions to Sales, Products, Stores. If you would like to setup a separate user with these permissions, you can do so by going to **Magento > System > User Roles > Create new role**. Then going to **Magento > System > All Users** and creating a new user with the role permissions you just created.

* **Magento 2 Username**

* **Magento 2 Password**

5. Complete your store integration by configuring your ShippingEasy store settings. These steps are outlined in the third section of this article.

If you are connecting your Magento 2 store to an existing ShippingEasy account 

Configure your ShippingEasy store settings 

If you have problems that require extra assistance, feel free to reach out to our team.

- Anyone can post questions in our [Community forum](#) and our Customer Success team will be happy to assist.
- All accounts will see links for additional resources in the upper left corner in app:

New accounts trialing on a paid plan (Basic and above) will see links to email or call our Sales Team.

Fully registered accounts on a paid plan (Basic and above) will see links to email, call, or chat our Customer Success team.
