

# Connecting to Shopgate

[Magento 2](#) is a supported shopping cart system at Shopgate.

By setting up Shopgate plugin in your Magento 2 shop, you will get these wonderful features straight into your app and mobile website:

Support		Import to Magento 2	
Version	2.1+	Orders	✓
Customer Account		Export to Shopgate Mobile Shop	
Login with Desktop Shop Account	✓	Products	✓
Login to Desktop Shop with Mobile Account	✓	Categories	✓
Customer Groups / Tier Pricing	✗	Reviews	✓
Show Desktop Orders on Mobile	/✗ ✗		
Sync		Validate, upon Cart Changes	
Delivery Status "Shipped"	✗	Coupon	✓
Order Status "Canceled"	✗	Shipping Method	✓
Stock Quantity, on Product Detail Page	✗	Payment Method	✗
		Product Availability	✓
Supported Payments		Notes	

Payment methods are not mapped to the native Magento 2 implementations at the moment. This means that orders imported from Shopgate can NOT be captured or refunded from your Magento 2 backend. This is planned to be implemented in the near future.

Other supported features:

- Info from the Shopgate custom fields (2nd phone number, birthday, etc.) is now imported as order details in your Magento 2 backend.
- Bundle, group, configurable, and simple products
- Group pricing for simple and configurable products

In this article, you will find everything you need to set up the Shopgate plugin for your Magento 2 shop.

Topics covered in this article:

1. Installing the Shopgate plugin
  - 1.1 Getting started
  - 1.2 Installing the Shopgate plugin
2. Connecting the plugin to Shopgate
3. Understanding the plugin configurations
4. Frequently Asked Questions (FAQ)
  - 4.1 How to disable or flush the internal cache in Magento?

# 1. Installing the Shopgate plugin

## 1.1 Getting started

To prevent your Magento 2 storefront from becoming temporarily unavailable while installing the Shopgate plugin, disable cache in your Magento 2 backend:

**Before you install or update the Shopgate plugin,**

- 
- ✓ disable Magento cache if enabled
  - ✓ disable all external caching (e.g. Varnish, APC, ZendCache) if used

**After you install or update the Shopgate plugin,**

- ✓ enable Magento cache again
  - ✓ flush the internal cache and all external cache immediately
- 

## 1.2 Downloading the Shopgate plugin

Download the Shopgate plugin for Magento 2 [here](#) and have your IT specialist install it onto your shop's server.

# 2. Connecting the plugin to Shopgate

After the Shopgate plugin has been installed, follow the steps here to connect your mobile shop to your Magento 2 backend.

1. Log in to your [Shopgate Admin](#)
2. Navigate to **Integration** then **+** **Install Interface**.
3. In section "New Connection", search for **Magento 2** in the drop-down and select it when it appears.
4. A pop-up opens.

## Integration

### New Connection

Start to integrate your website to Shopgate's technology by selecting your shopping cart system from the drop-down list.

---

## 2.1 Getting API credentials

In the pop-up, copy **Customer number**, **Shop number**, **API key**, and **Alias** and paste them individually into the plugin configurations in your Magento 2 admin panel (*Stores > Settings > Configuration*).

**Connecting to Magento 2**

**1. Configure**  
Set up the API credentials in your store.

<b>Customer number</b>	1022370
<b>Shop number</b>	12345
<b>API key</b>	b076a5eab16fba8e8de1
<b>Alias</b>	myawesomeshop

**2. Enter URL**  
Provide the link to your online shop.

URL to your store:

Please notice that without https some functions won't be available due to se

**Configuration details (highlighted in red boxes):**

- Enabled** [store view]: Yes
- Customer number** [store view]: 1022370
- Shop number** [store view]: 12345
- Api Key** [store view]: b076a5eab16fba8e8de1
- Website alias** [store view]: myawesomeshop  
Link: [Shopgate merchant area](#)

The rest of the plugin configurations can be entered later. This is explained in [Understanding the plugin configurations](#)

## 2.2 Connecting your shop to Shopgate

Under 2. *Enter URL*, enter the URL of your shop. Click **connect** to establish the interface.

## Connecting to Magento 2

### 1. Configure

Set up the API credentials in your store.

Customer number	1022370
Shop number	12345
API key	b076a5eab16fba8e8de1
Alias	myawesomeshop

### 2. Enter URL

Provide the link to your online shop.

URL to your store	<input type="text" value="https://myawesomeshop.com"/>
-------------------	--

Please notice that without https some functions won't be available due to se

If a connection is made successfully, a popup shown below will open. Leave all assignments to **ON** to access all the features. Click **Save**.

Your current assignments:

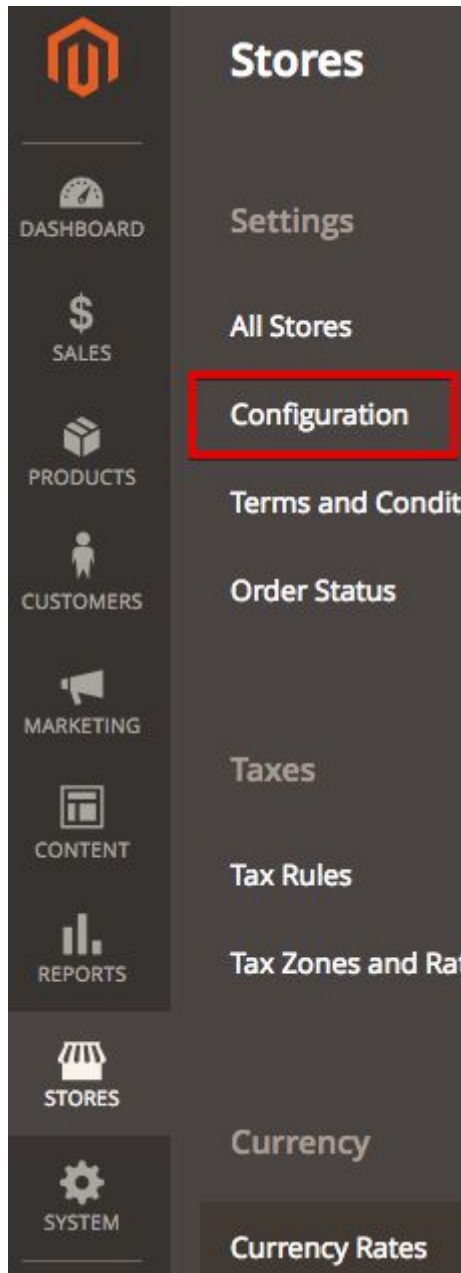

<input checked="" type="checkbox"/>	<b>Order processing</b> This interface is responsible for transferring order data. When mobile orders are placed and accepted by your shop system, you will be notified automatically.
<input checked="" type="checkbox"/>	<b>Shopgate Connect</b> With Shopgate Connect, your customers have the ability to use their existing login credentials on the mobile website. They will not be required to register again on the mobile website.
<input checked="" type="checkbox"/>	<b>Product import</b> This interface is responsible for the import of your products. Shopgate imports your products regularly, keeping your product inventory up to date.
<input checked="" type="checkbox"/>	<b>Category Import</b> This interface is responsible for the import of your categories. Shopgate imports your categories regularly, keeping your category structure up to date.
<input checked="" type="checkbox"/>	<b>Import reviews</b> This interface imports your product reviews from your shop system into Shopgate. The interface exports the information on a regular basis, keeping your product reviews up to date.

Cancel

That's it! Now the Shopgate backend will automatically start to import product data via the newly established interface.

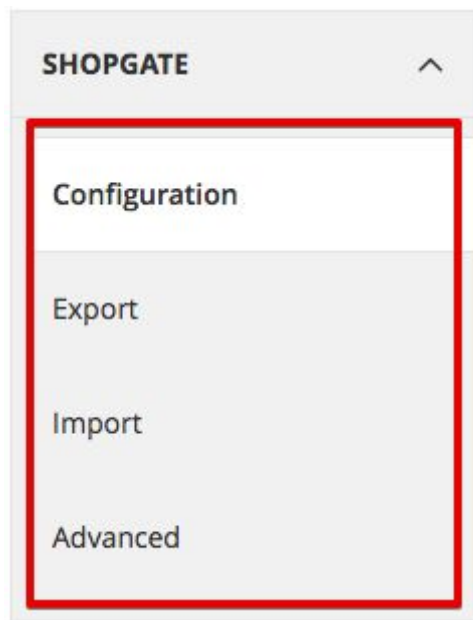

# 3. Understanding the plugin configurations

In this chapter, we will explain all the options you have for configuring the Shopgate plugin in your Magento 2 backend.

To locate the Shopgate configuration, follow the steps here:

1. Log into your *Magento 2 Admin Panel*
2. Navigate to **Stores > Settings > Configuration**.
3. You will see **SHOPGATE** listed on the configuration page.
4. Use these sections to configure your Shopgate plugin: *Configuration, Export, Import, Advanced*

# Shopgate | Configuration

## Basic Configuration

Click [here](#) to sign up for a Shopgate account

<b>Enabled</b> <small>[store view]</small>	Yes
<b>Customer number</b> <small>[store view]</small>	<input type="text"/>
<b>Shop number</b> <small>[store view]</small>	<input type="text"/>
<b>Api Key</b> <small>[store view]</small>	<input type="text"/>

## Mobile Settings

<b>Redirect Type</b> <small>[store view]</small>	HTTP (recommended)							
<b>Website alias</b> <small>[store view]</small>	myawesomeshop <small>Link: <a href="#">Shopgate merchant area</a></small>							
<b>Custom URL (incl. http(s)://)</b> <small>[store view]</small>	http://m.myawesomeshop.com <small>Link: <a href="#">Shopgate merchant area</a></small>							
<b>CMS Map</b> <small>[store view]</small>	<table><thead><tr><th>Page</th><th>URL Key</th><th>Action</th></tr></thead><tbody><tr><td><input type="text"/></td><td><input type="text"/></td><td></td></tr></tbody></table> <ul style="list-style-type: none"><li>✓ 404 Not Found</li><li>Home Page</li><li>Enable Cookies</li><li>Privacy Policy</li><li>About us</li><li>Customer Service</li></ul> <small>Note: only one entry per page allowed</small>	Page	URL Key	Action	<input type="text"/>	<input type="text"/>		
Page	URL Key	Action						
<input type="text"/>	<input type="text"/>							

## Basic Configuration

<b>Enabled</b>	Select <b>Yes</b> to activate the Shopgate plugin in your Magento 2 backend.
<b>Customer number</b>	Your <a href="#">customer number</a> at Shopgate.
<b>Shop number</b>	Your <a href="#">shop number</a> at Shopgate.

<b>API Key</b>	Your <a href="#">API Key</a> generated at Shopgate. This key is used to authenticate your account between Shopgate and Magento.
----------------	---

### Mobile Settings

<b>Redirect Type</b>	Select your redirect type: HTTP or JavaScript. HTTP is recommended because it is more SEO friendly.
<b>Website alias</b>	Your Shopgate alias.
<b>Custom URL</b>	A URL used for the mobile version of your shop. The default is [alias].shopgate.com, an alternate could be m.[alias].com
<b>CMS Map</b>	This feature allows mapping a Magento 2 CMS page to <a href="#">a CMS page</a> created in your Shopgate Admin. Provide the URL key used by the CMS page in Shopgate.

## Shopgate | Export

## Categories

**Force export disabled categories**  
[store view]

List a comma separated list of category ID's (e.g. 1,4,6,34)

**In navigation only**  
[store view]

Use system value

Export categories that only have the "Include In Navigation" checked

## Products

**Description**  
[store view]

Select description content for export

**EAN attribute**  
[store view]

Select the attribute used for the EAN

## Miscellaneous

**Net Market Countries**  
[store view]

- Afghanistan
- Aland Islands
- Albania
- Algeria
- American Samoa
- Andorra
- Angola
- Anguilla
- Antarctica
- Antigua and Barbuda

Use system value

Defines which countries should get treated like NET markets for tax purposes (e.g. United States)

## Categories

<b>Force export disabled categories</b>	List a comma separated list of category ID's (e.g. 1,4,6,34) which should be exported even if they are disabled.
<b>In navigation only</b>	Export categories that only have the "Include In Navigation" checked

## Products

<b>Description</b>	Choose how you want to export your descriptions: Short description, Description + short description, Short description + description.
<b>EAN attribute</b>	Select the attribute used for the EAN from the list.

## Miscellaneous

<b>Net Market Countries</b>	Use the default value from Magento 2 or select the countries where your product prices are defined before tax (e.g. United States)
-----------------------------	--

## Shopgate | Import

### Order

**Send email to customer on new order**

[store view]

Yes

Note: Shopgate also sends a order confirmation email to the customer!

**Shopgate Shipping Carrier Title**

[store view]

Fixed

Note: Will be visible in Customer Account and transactional Mails!

### Order

<b>Send an email to customer on new order</b>	On each order import the customer will get an order confirmation mail after import. This flag should be used in conjunction with the 'send confirmation mail' flag in the Shopgate merchant area.
<b>Shopgate Shipping Carrier Title</b>	This text field allows the merchant to define a shipping title for any shipping handled by Shopgate. This shipping title is used in emails and order details.

## Shopgate | Advanced

## Staging

Shopgate server [store view]  ?

Shopgate Merchant API URL [global]  ?

Htaccess user [global]  ?

Htaccess password [global]  ?

## Staging

<b>Shopgate server</b>	Select the Shopgate "Live" server. Use the other options only for debugging purposes.
<b>Shopgate Merchant API URL</b>	This field is used only when Shopgate server is set to "custom" and is only useful for debugging purposes.
<b>.htaccess user</b>	.htaccess user and password are only used to bypass additional htaccess authentications.
<b>.htaccess password</b>
