

Duplicate CMS Page/Block Magento2

Installation Guide

Compatibility: Magento 2.X

1. How To Install extension?

As per Magento standard you have to install extension via magento connect but currently Magento2.X doesn't provide this feature so you have to follow Manual Installation step guide line.

- ✓ Go to app > code Directory (If you don't have "code" directory then simply create It.)
- ✓ Go to Shreeji Directory.(If you don't have "Shreeji" this directory then simply create It)
- ✓ Unzip the package into Shreeji directory.
- ✓ After that you have to perform below command to enable this extension
 - bin/magento module:enable Shreeji_Duplicatecms
 - bin/magento setup:upgrade
- ✓ And don't forgot to clear your webshop cache using below command
 - bin/magento cache:flush

2.Troubleshooting:

If you have any issue/bug during installation extension, please do not hesitate to contact us at support@shreejiinfosys.co.in
