

Single Sign On. SAML extension for M 2. (Implemented by Sixto Martin)

Installation

Steps to install the Magento 2.0 connector via Composer

Prerequisite: Add the private repository provided by the owner inside the composer.json

```
...  
"repositories": [{  
    "url": "<<PRIVATE REPO URL>>"  
}]  
...
```

1. Set up the correct path for Composer or keep Composer within Magento root.
2. In Magento root, run command 'composer require pitbulk/oneLogin-module-saml2'.
3. After the above is successful, run the command 'php bin/magento module:enable Pitbulk_SAML2' in Magento root. This will let Magento know about the module.
4. Run the command 'php bin/magento setup:di:compile' if you have a single website and store, or 'php bin/magento setup:di:compile-multi-tenant' if you have multiple ones.
5. Clear cache from Magento admin.

Steps to install the Magento 2.0 connector via FTP/ZIP File

1. Unzip the ZIP file.
2. Make sure to create the directory structure in your Magento - 'Magento_Root/app/code/Pitbulk/SAML2'.
3. Drop/move all of the content inside the unzipped folder to directory 'Magento_Root/app/code/Pitbulk/SAML2'.
4. Run the command 'php bin/magento module:enable Pitbulk_SAML2' in Magento root. This will let Magento know about the module.
5. Run the command 'php bin/magento setup:di:compile' if you have a single website and store, or 'php bin/magento setup:di:compile-multi-tenant' if you have multiple ones.
6. Clear cache from Magento admin.
