

SMARTCAT TRANSLATION MANAGER USER GUIDE

Smartcat Translation Manager is an extension provides you possibility easy connect to a simple, powerful, and free localization solution and takes your localization processes to new level through professional Computer-Assisted Translation (CAT) tools and Supply-Chain Management capability. Use Smartcat Translation Manager to choose the product's content and translate it to 150+ languages. Translation process will be on Smartcat's side, therefore, you do not need extra effort.

Connect to Smartcat

Install the extension as you would any other extension.

Use smartcat.ai to work with Europe server, us.smartcat.ai to work with the US server and ea.smartcat.ai to work with Asian server.

Step 1

After installation select “Stores -> Configuration” at main menu.

Step 2

Move to “Localization -> General -> Smartcat Translation Manager” where you will select a Smartcat server, put into API Key and Smartcat Account ID.

Step 3

If you have no account at Smartcat, than go to smartcat.ai and registry your account by clicking on “CREATE AN ACCOUNT” button.

I'm a freelancer Translation company Company

[I AM A STUDENT/TEACHER](#)

- For “Freelancer” at Smartcat provides a way to find some orders from global translation companies and companies, advanced CAT editor and tools for free, but the Smartcat Translation Manager is not available.
- For “Translation Company” Smartcat provides a framework to make your payments painless as for end-customer as for freelancers, full control of your team, suppliers and content received from any place of Smartcat ecosystem, including Magento. No more stress-full management is required.
- For “Company” Smartcat provides a way how to manage a translation on autopilot. There are easy-to-find translation vendors, freelancers or control your inhouse team.

Both, “Translation Company” and “Company” can use Smartcat Translation Manager.

In this case we assume you are a “Company”, so select that tab and provide some additional information.

Configure a translation process and Smartcat Translation Manager behavior

To translate content via Smartcat, you should define a translation process. For that reason, go to “Localization -> Profiles” and click “New Profile” button.

Localization

Profiles

Dashboard

[New Profile](#)

Filters | Default View | Columns

20 per page | 1 of 1

Source Language	Target Language	Workflow	Name	Excluded Attributes	Auto Send New	Auto Send Updated	Batch Send	Action
English	Chinese (PRC)	Translation	Test translation to Chinese	No excluded attributes	No	No	Yes	Select

Commerce Inc. All rights reserved. **Magento ver. 2.2.6** [Report an Issue](#)

In new profile you will be able to configure two sections a translation process and Smartcat Translation Manager behavior:

Name

The name of profile. You will be able send to translation your products via same button occurred at action context menu under a Localization item.

Translation agency

You can select a way whom will manage a translation process: in-house localization manager or some Translation agency. But if you want delegate a project to Translation agency, please contact us via email to support@smartcat.ai. We will help you to find a proper agency and enable this option at your Smartcat account.

Source language

Language of the source content.

Target languages

One or more languages will be used as translation target.

Workflow

There are stages of your translation process, which directly perform to quality of translation.

Send all products in one batch

Automatically send new products for translation

Automatically send each product update for translation

When you configure a "Profile" click to "Save Profile" button.

Submit for translation and monitor results

Now you can translate any page straight from your Magento admin panel.

Step 1

Select a batch of products you want to translate at your "Catalog" in "Products" section.

Step 2

Choose Item to translate and Profile name for your translation project.

Step 3

Click on “Submit for translation” button at Actions Context Menu

Great! You’ve launched translation project and sent to Smartcat translators.

Step 4

You can monitor status of translation via special “Dashboard” item a “Localization”.

Here you can understand what type of products was sent to translation, what type of translation used and current status of translation.
