• [2.0](#)

• [NopCommerce](#)

• [2.65](#)

• [3.40](#)

• [3.50](#)

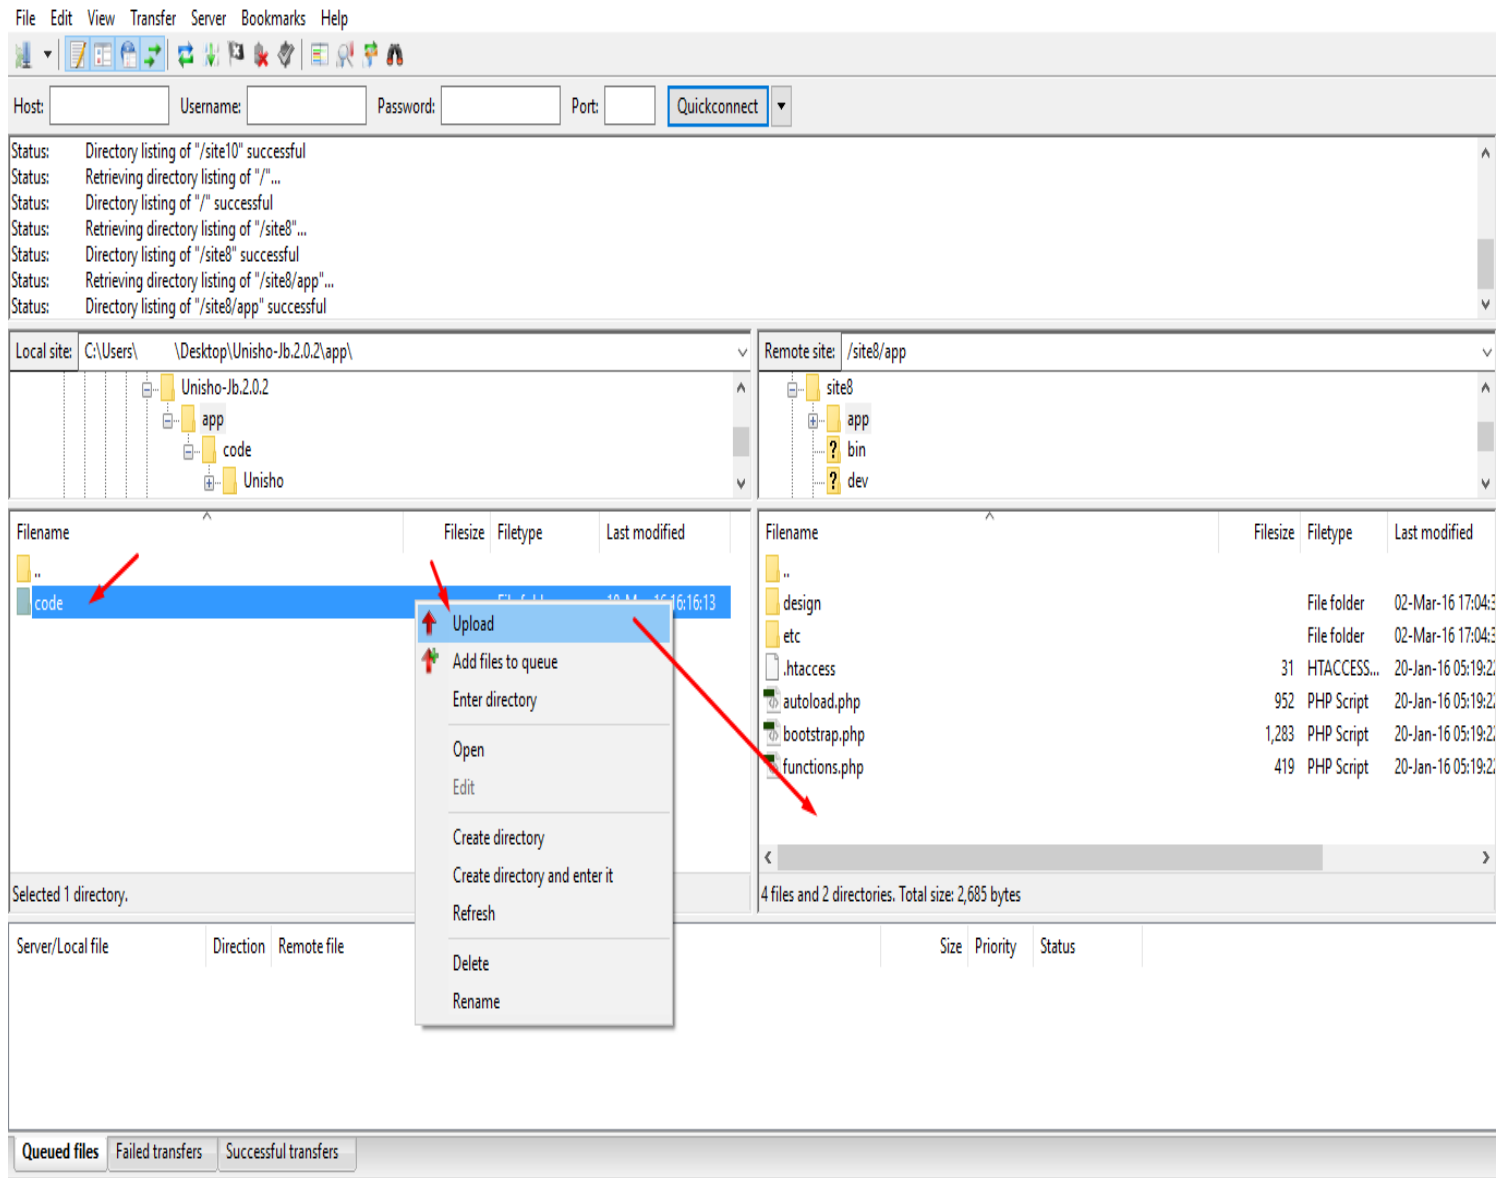

• [3.60](#)

• [3.70](#)

Choose Magento 2 version and download it. (Do not close this tab)

Once you have the zip containing the extension

- Extract the content of the zip file (code folder) you downloaded from our store into your Magento 2 root/app folder. (see picture below)

• Open a console shell, go to your magento root directory and run:

• `php bin/magento module:enable Unisho_Jb`

• `php bin/magento setup:upgrade`

Install the module first in a development environment, never install any module directly in a live site and be sure to make a complete backup of your site before

- Then go to <https://mlm-socialbug.com> and click on Socialbug Setup again (see picture below)

- Go to your Magento 2 website then click Settings/Integrations/Add New Integration
