

Easy Contact Widget

Installation/User Guide

Installation Process:

Note: Please take a backup of your all Magento files and database before installing or updating any extension.

Extension Installation:

- Download the Easy Contact Form Widget .ZIP file from the Magento account.
- Log in to the Magento server (or switch to) as a user, who has permission to write to the Magento file system.
- Create folder structure **/app/code/Solwin/Contactwidget/** to your site root directory
- Extract the contents of the .ZIP file to the folder you just created
- Navigate to your store root folder in the SSH console of your server:
- Run upgrade command as specified : **php bin/magento setup:upgrade**
- Run deploy command as specified : **php bin/magento setup:static-content:deploy -f**
- Clear the cache either from the admin panel or command line **php bin/magento cache:clean**
- Now, you can see the Solwin menu in admin panel. Please go to **Solwin -> Contact Form Widget -> Configuration** and select **Enable** to Yes.
- Change/Set all other options as per your requirements and save settings.

Overview:

Easy Contact Widget extension for Magento 2 allows the store owners to incorporate a contact/inquiry or website feedback form in their store easily at any place using a widget.

The widget enables the visitor to submit the details of inquiry/feedback in the provided form to the store.

The store owners can easily enable/disable Google reCaptcha within the contact form to protect the online store from spammers.

The extension provides the facility to set a custom email template for contact inquiry. The store owners can easily add this widget to the CMS page and static blocks.

The extension allows creating unlimited contact forms.

Key Features

The Extension provides the following features:

- The store owners can easily enable/disable Google reCaptcha to contact form.
- The store owners can add this powerful widget to any CMS and static blocks.
- Allows adding contact form in the sidebar using a widget.
- The store owner can easily set their custom email template for contact.
- The widget provides the facility to enter the title and a short description for the form.
- Allows creating unlimited contact forms.

Admin control panel:

Go to **Solwin >> Contact Form Widget >> Configuration**, the **Contact Form Widget Magento 2 extension** allows the store owner to enable or disable the module from admin.
