

Google Custom Search Integration

Installation/User Guide

Installation Process:

Note: Please take a backup of your all Magento files and database before installing or updating any extension.

Extension Installation:

- Download the Google Custom Search Integration extension .ZIP file from the Magento account.
- Log in to the Magento server (or switch to) as a user, who has permission to write to the Magento file system.
- Create folder structure **/app/code/Solwin/GoogleCustomSearch/** to your site root directory
- Extract the contents of the .ZIP file to the folder you just created
- Navigate to your store root folder in the SSH console of your server:
- Run upgrade command as specified : **php bin/magento setup:upgrade**
- Run deploy command as specified : **php bin/magento setup:static-content:deploy -f**
- Clear the cache either from the admin panel or command line **php bin/magento cache:clean**
- Now, you can see the Solwin menu in the admin panel. Please go to **Solwin -> Google Custom Search Integration -> Configuration** and select **Enable** to Yes.
- Change/Set all other options as per your requirements and save settings.

Overview:

Google Custom Search Integration extension allows store owners to set up a custom search feature for the website. With Google Custom Search Integration, site owners can define their search engines for their website. It is a very helpful extension to make the most out of Google power and provide search results from sites. It also enhances search engine optimization performance. This extension makes it very easy for the store owner to bring powerful website search functionality to its users or visitors.

Key Features

Extension provides below features:

- Use Google Search Algorithms.
- Helps to increase SEO for the store.
- Integration of image search results.
- Customization of displaying results.
- Easy replacement with inbuilt search functionality.
- The store owner can enable/disable auto-complete features – which makes querying even faster.
- It provides an easy interface to manage all settings from the admin panel. So, no coding experience is required.
- Works in Multi-store environments.

Admin control panel:

In the admin control panel, go to **Solwin >> Google Custom Search Integration >> Configuration, Google Custom Search Integration Magento 2 extension** allows store owner to enable or disable the module from admin.

There are some configuration options for Google Customer Search Integration. Let's discuss all in more detail.

If the store owner wants to set Google Custom Search using **Search Engine Unique Id** then set

Custom Search Settings

Enable <small>[store view]</small>	Yes
