

Mega Menu

Installation/User Guide

Installation Process:

Note: Please take a backup of your all Magento files and database before installing or updating any extension.

Extension Installation:

- Download the Mega Menu .ZIP file from the Magento account.
- Log in to the Magento server (or switch to) as a user, who has permissions to write to the Magento file system.
- Create folder structure **/app/code/Solwin/Megamenu/** to your site root directory
- Extract the contents of the .ZIP file to the folder you just created
- Navigate to your store root folder in the SSH console of your server:
- Run upgrade command as specified : **php bin/magento setup:upgrade**
- Run deploy command as specified : **php bin/magento setup:static-content:deploy -f**
- Clear the cache either from the admin panel or command line **php bin/magento cache:clean**
- Now, you can see the Solwin menu in admin panel. Please go to **Solwin -> Mega Menu -> Configuration** and select **Enable** to Yes.
- Change/Set all other options as per your requirements and save settings.

Overview:

Mega Menu extension for Magento 2 helps to create a clean, professional Magento 2 navigation menu. No technical skills needed! The store admin can easily manage the menu with categories, pages, blocks.

Show categories in multiple formats to fit each category structure and provide a better navigation experience.

The mega menu extension for Magento 2 provides to Add Custom URL, Custom Blocks, Custom Page, and External URL with Mega Menu.

The store owners can set Visible Menu Depth to display or hide the submenu with depth limitation.

The store owners can set labels to category and subcategory.

Key Features:

The Extension provides the below features:
