

ADVANCED SORTING

USER GUIDE

Version 1.0.0

Welcome to Advanced Sorting Extension for Magento 2 developed by Sparsh.

This extension allows customers to sort products by Best Sellers, Top Rated, New Arrivals, Most Viewed, Reviews Count, and Low to High Price and High to Low Price options on catalog listing page.

KEY FEATURES:

- ❖ Easy To Install & Manage
- ❖ Enable/Disable from the backend
- ❖ Select multiple sort options
- ❖ Multi-Store Supported
- ❖ 100% Open Source

1. HOW TO ENABLE ADVANACED SORTING

In order to use this extension, you first need to enable it from backend.

Go to Magento 2 Admin > Login > Stores > Configuration > Sparsh Extensions > Advanced Sorting.

Expand the **General Settings** section, and do the following:

- **Enable:** Select “Yes” to enable for selection sorting options on category page.

General Configuration

Enable [store view] Yes Use system value

Select Yes to enable this module

2. SELECT CATALOG SORT TYPES TO BE SHOWN/ALLOWED ON FRONTEND

Go to Magento 2 Admin > Login > Stores > Configuration > Sparsh Extensions > Advanced Sorting.

Expand the **General Settings** section, and do the following:

- **Select Catalog Sort Type:** Uncheck “Use system value” checkbox and select types you want to have on frontend.

Available sorting options are:

Best Sellers – Products will be sorted by sales quantity

Top Rated – Products will be sorted by average ratings

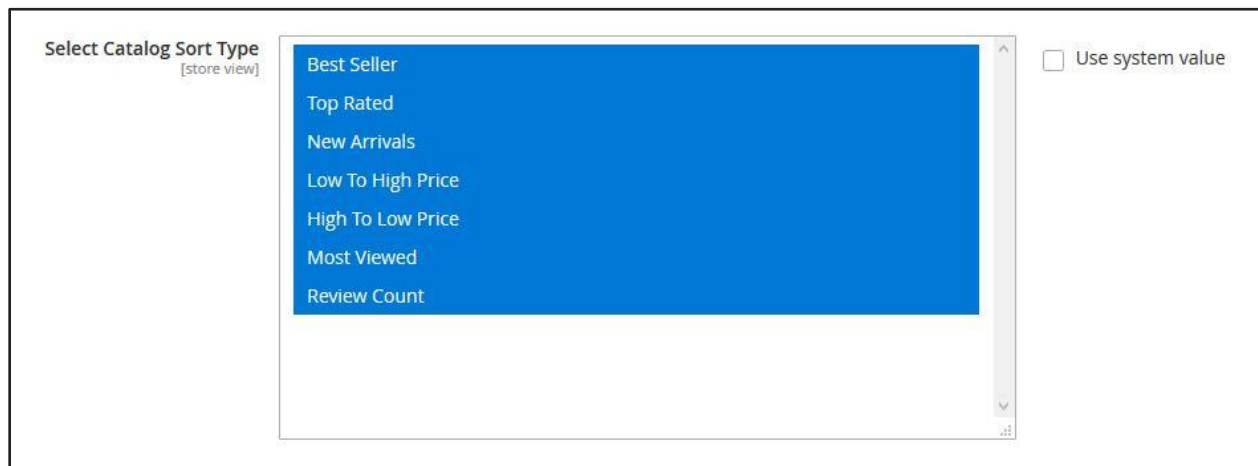

New Arrivals – Products will be sorted by the date of creation

Low To High Price – Products will be sorted by price from low to high

High To Low Price – Products will be sorted by price from high to low

Most Viewed – Products will be sorted by the number of visits

Reviews Count – Products will be sorted by reviews count

3. STORE FRONT VIEW

Clear cache from System > Tools > Cache Management if required.

Selected sorting options will be available on Category page as shown below.
