

MOST VIEWED PRODUCTS

USER GUIDE

Version 1.0.1

We, at Sparsh have developed the Most Viewed Products Widget Slider Extension for Magento 2 to display the most viewed products to the user.

This extension is used to display most viewed products on your storefront. You can use it anywhere like the home page or any other pages so customers can view and buy it. Display most viewed products using block and widget.

Every below steps helps to show most viewed products on your site.

1. HOW TO ADD MOST VIEWED PRODUCTS WIDGET SLIDER FOR GIVEN CMS PAGE

Go to [Magento 2 Admin] > Login > Content > Elements > Pages > Add / Edit Page
Open “Content” > Click on “Show / Hide Editor” button > Click on “Insert Widget” button

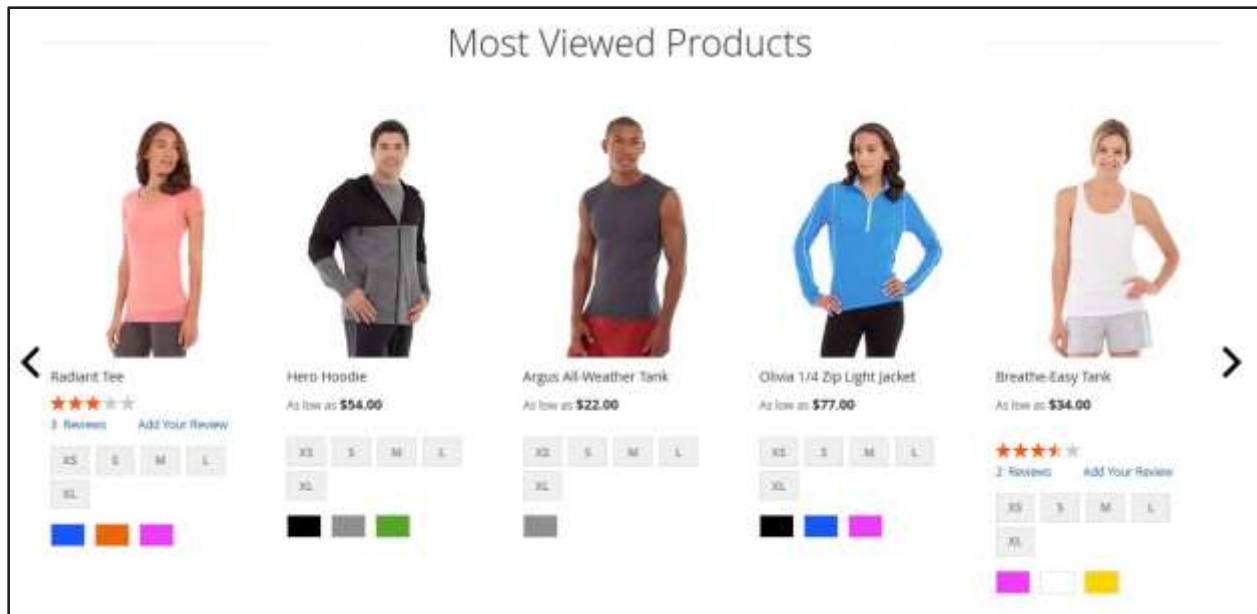

Choose Widget Type as “Most Viewed Product” > Click on “Insert Widget” button

2. STORE FRONT VIEW

Clear cache from System > Tools > Cache Management if required.

Showing your most viewed products like below on storefront.

Note: If there is not any product viewed by any user yet, then it won't be display in storefront.
