Payment Action [website] Charge my consumer when the shipment is ready

Splitit can accept Visa and MasterCard credit cards from all over the globe. As the merchant, you have the option to accept payments from all applicable countries or choose specific countries.

We suggest enabling the help link at all times. The help link explains to the consumer how Splitit works and will help in avoiding frustration from the consumer at checkout.

The “Payment Action” determines if the consumer will be charged the first installment immediately or after shipping.

Credit Card Types

Add Shipping

You can choose the add Shipping/Taxes/Shipping & Taxes to either the 1st payment, or have divided into the number of installments chosen by the consumer.

When setting up your installments, you are given two options, “Fixed Installments” or “Installments Depending on Cart Total”. The “Fixed Installments” option will show the same amount of installments offered for all cart totals. The “Depending on Cart Total” option allows you to limit the amount of installments offered according to cart total.

To \$ <input type="text"/>			

Add Tier

Displaying the estimated monthly payment messaging on your product and shopping cart pages is the most effective way to increase your total sales and average order value with Splitit. This will increase the add to cart rate by 8-10%.

We suggest having the Installment Price enabled throughout your site to increase the effectiveness of Splitit.
