

Magento 1.9 has a slightly different interface than Magento 2.0 and thereby requires different set of steps for its configuration with StorePep. For shop-owners looking to integrate Magento 2.0, you can refer the article '[Integrating Magento 2.0 with StorePep](#)'.

Integration with Magento 1.9 store with Storepep requires you to define API keys for a user with a defined user role. In this article, we will cover the steps you need to follow to get the API keys. And once done, we will see how you can integrate your Magento 1.9 store with StorePep thereby displaying Shipping rates in your store's checkout.

## Get API Keys From Your Magento1.9 Store

In Magento 1.9, the first step is to create a user for which the API Key can be configured. This can be done by navigating to the menu 'System --> Web Services --> Soap/XML-RPC-USERS under Magento Admin Panel

The screenshot shows the Magento 1.9 Admin Panel interface. At the top, there is a 'Global Record Search' box. Below it, a navigation menu includes 'System'. A dropdown menu is open under 'System', showing 'Web Services' as the selected option. A sub-menu is open under 'Web Services', listing various services, with 'SOAP/XML-RPC - Users' highlighted. The background shows a table of orders with columns for 'Purchased On', 'Bill to Name', and 'Ship to Name'. The table contains several rows of order data, including dates and names.

Purchased On	Bill to Name	Ship to Name
Oct 30, 2018 9:34:31 AM	Australia Person	Australia Person
Oct 30, 2018 9:26:33 AM	Australia Person	Australia Person
Oct 29, 2018 6:06:28 AM	Australia Person	Australia Person
Oct 29, 2018 6:02:31	Australia Person	Australia Person

Once you are inside the user section, under 'User info' define the user details and the API Key :

**Account Information**

User Name *	<input type="text" value="storepepUser"/>
First Name *	<input type="text" value="storepep"/>
Last Name *	<input type="text" value="storepep"/>
Email *	<input type="text" value="keerthi@plughive.com"/>
Current Admin Password *	<input type="password"/>
New API Key	<input type="text"/>
API Key Confirmation	<input type="text"/>
This account is	<input type="button" value="Active"/>

Under 'User Role', select the User Role associated with the user :

**User Information**

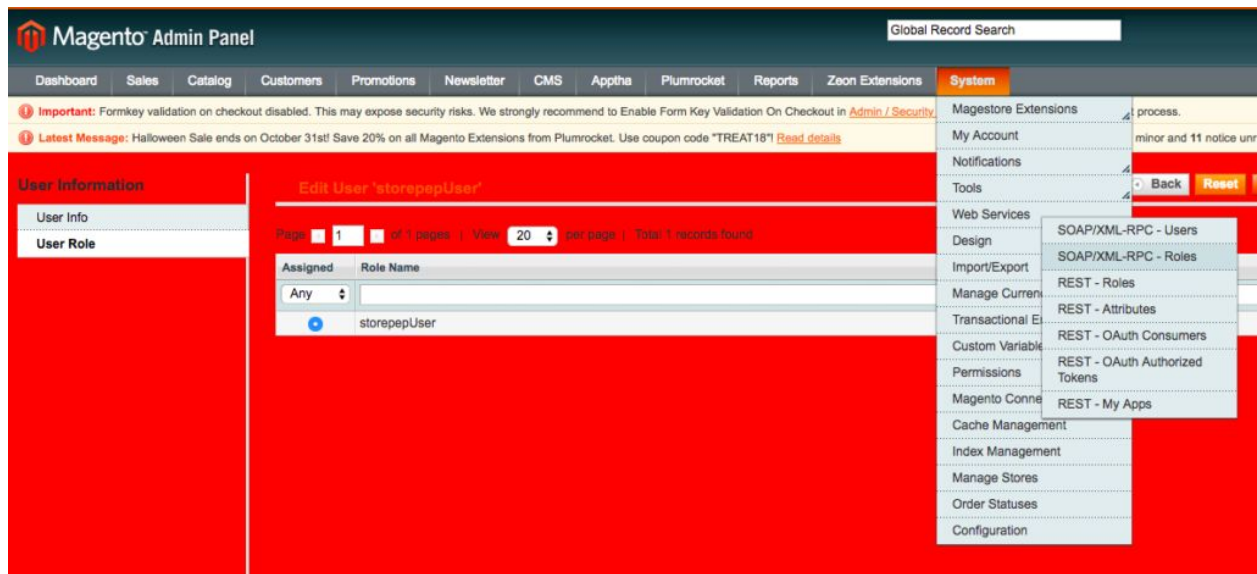

- User Info
- User Role**

**Edit User 'storepepUser'**

Page 1 of 1 pages | View 20 per page | Total 1 records found

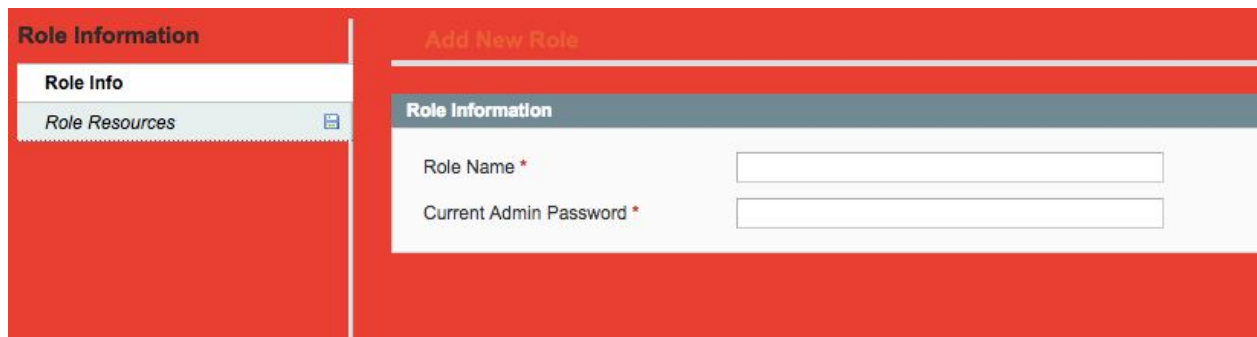

Assigned	Role Name
Any	<input type="text"/>
<input checked="" type="radio"/>	storepepUser

If you do not see any User Role, that means a new User role has to be created. To do that, navigate to the menu 'System --> Web Services --> Soap/XML-RPC-Roles under Magento Admin Panel and click on 'Add New Role' :

Under Roles, the shop-owner has to define :

- Role Info :

- Role Resources : It is advisable to allow all Resources if you are the admin.

Now, that you know the User Name and API Key, let us head to StorePep.com

## Enter API Key in StorePep

Step 1.) Login to StorePep & visit Settings

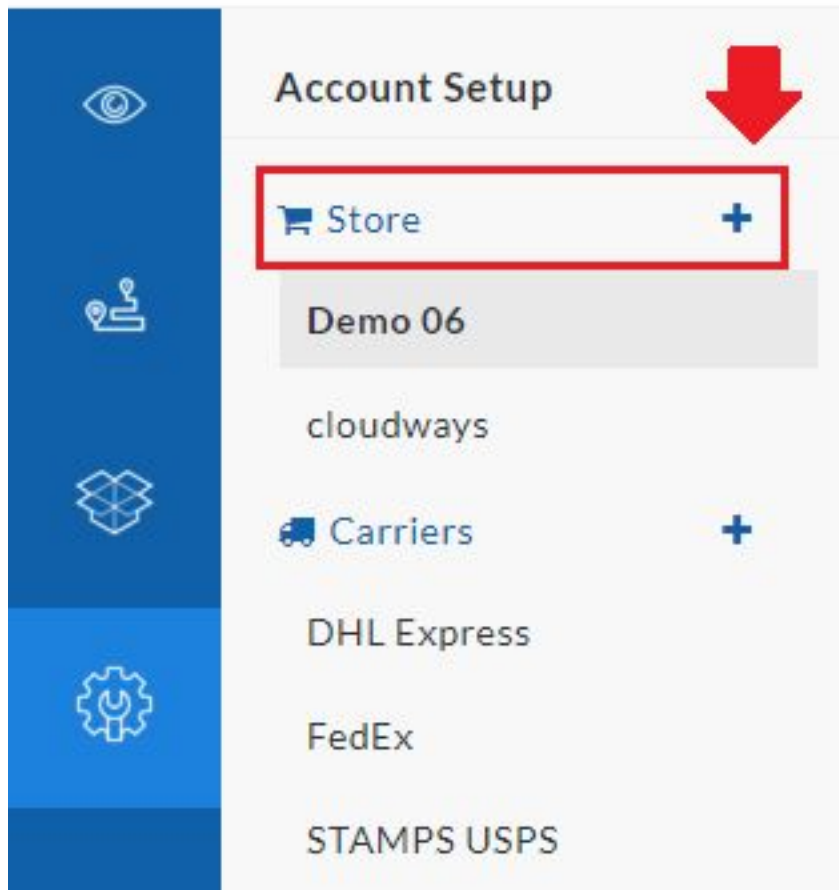

The screenshot shows the StorePep dashboard. On the left is a blue sidebar with several white icons: an eye, a location pin with a magnifying glass, a box, a gear (highlighted with a red box and a red arrow pointing to it), and an upward-pointing arrow. To the right of the sidebar is a white area with the heading "Views" and a table of order statuses.

Views	
All Orders	27
Processing	0
Label Created	6
Label Failed	0
Pickup	
Manifest	
Shipped	16

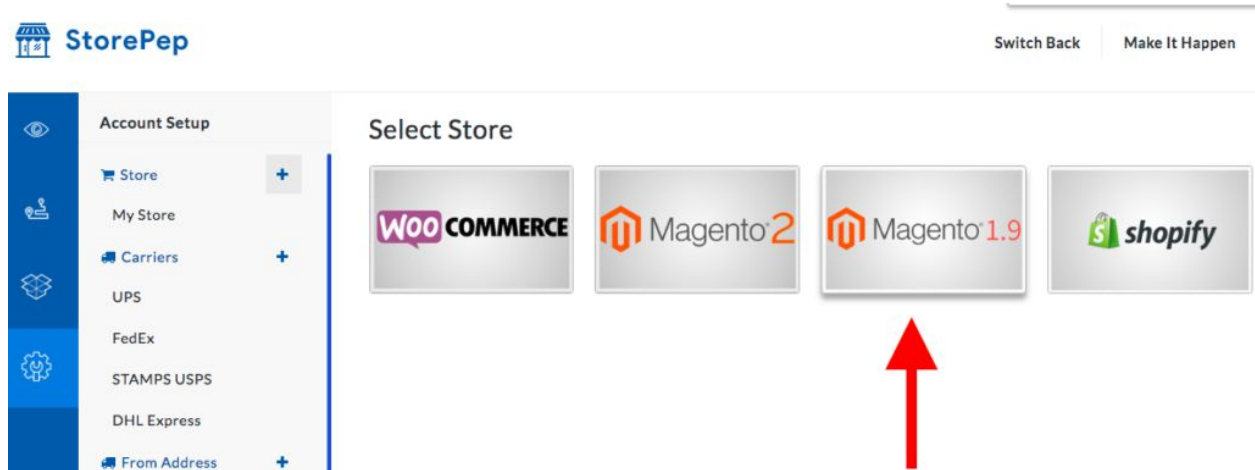

Storepep Settings on Home

Step 2.) Visit Stores option & Click on (+)

Adding Store in Storepep Settings

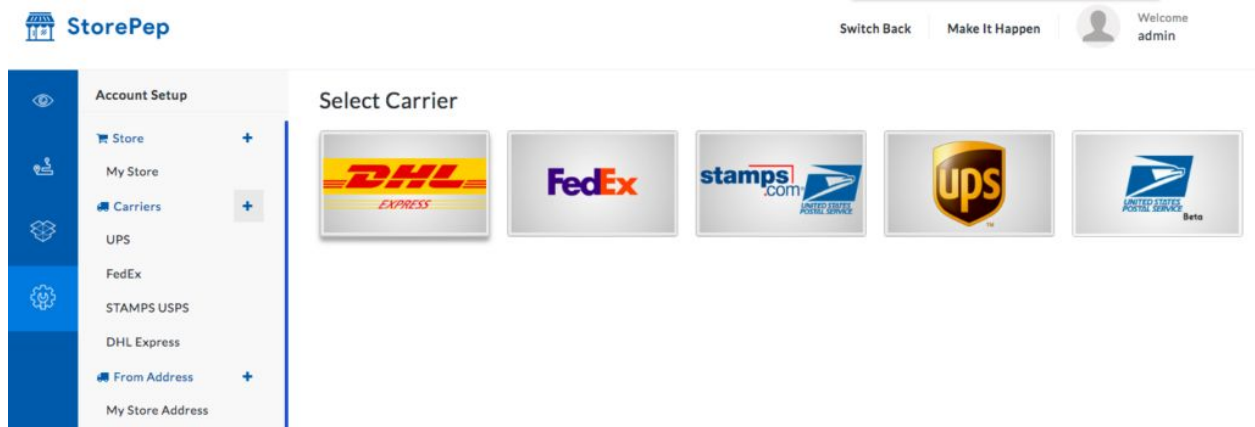

### Step 3.) Choose Magento 1.9

Step 4.) Add your Store URL, SOAP User Name, SOAP Access Key(API Key)  
Once you click on Add Store, your online Magento store will be successfully integrated with StorePep.

### Steps 5) Configure Shipping carrier :

Navigate to Carriers and click on any Shipping carrier that you want to configure in your StorePep account :

# Set Up DHL Account

## Account Details

Carrier Name\*

DHL Express

Account Number\*

130000279

Site ID\*

CIMGBTst

Site Password\*

DLUntOcJma

Production Key\*

Enable If Production Key

Don't Have DHL Credentials? 

Other Details 

ADD

Provide the details of the Shipping carrier and connect it with StorePep.

A quick look at the sample rates shown after configuring DHL Shipping carrier in StorePep :

### 3. Shipping Information

### 4. Shipping Method

DHL

- DHL EXPRESS WORLDWIDE LKR 58.84
- DHL EXPRESS 12:00 LKR 68.00
- DHL EXPRESS 10:30 LKR 76.84
- DHL MEDICAL EXPRESS LKR 58.84
- DHL EXPRESS EASY LKR 11.7
