

Direct Product Add to Cart

Installation Guide

Using composer:

Run below commands in your favourite command prompt/terminal in the directory where Magento is installed. Please backup your code/database before running below commands if you are not sure what you are doing.

```
composer require sukhvir1313/directproductadd
```

Enable the extension

```
bin/magento module:enable Sukhvir_DirectProductAdd
```

Magento will display commands to run before we can use the extension, if it does not you can clear the cache and recompile using below commands.

```
bin/magento cache:clean
```

```
bin/magento setup:di:compile
```

Manual Installation:

Once you get a zip file of DirectProductAdd from Magento you can create the folders below, if it does not exist in the folder where Magento is installed. Please consider the upper and lower case, those should be the same as below.

```
app/code/Sukhvir/DirectProductAdd/
```

unzip the zipped file in the DirectProductAdd folder so that you can file composer.json file in below path

```
app/code/Sukhvir/DirectProductAdd/composer.json
```

From Magento Admin section:

You can install it from the Magento admin section.

Do you want to increase your revenue by sharing product links and allow users to buy your product quickly?

Direct Product Add is the perfect solution for you. Just share links in different formats like, if you want to use sku use below formats

http://{yourdomain}/dpa/add/tocart/sku/{product_sku}

http://{yourdomain}/dpa/add/tocart/sku/{product_sku_1},{product_sku_2}

http://{yourdomain}/dpa/add/tocart/sku/{product_sku}-{product_quantity}

http://{yourdomain}/dpa/add/tocart/sku/{product_sku_1}-{product_quantity_1},{product_sku_2}-{product_quantity_2}

Add coupons in the url

http://{yourdomain}/dpa/add/tocart/sku/{product_sku}/coupon/{coupon_code}

Use product id

http://{yourdomain}/dpa/add/tocart/id/{product_id}

http://{yourdomain}/dpa/add/tocart/id/{product_id_1},{product_id_2}

http://{yourdomain}/dpa/add/tocart/id/{product_id}-{product_quantity}

**[http://{yourdomain}/dpa/add/tocart/id/{product_id_1}-{product_quantity_1},
{product_id_2}-{product_quantity_2}](http://{yourdomain}/dpa/add/tocart/id/{product_id_1}-{product_quantity_1},{product_id_2}-{product_quantity_2})**

Share these urls with your users through email, social media, blogs etc. Once a user clicks on this link, the products will be automatically added to cart and user will be redirected to cart or checkout page. You can change redirection page from admin section using Menu

Stores -> Configuration -> SUKHVIR (from left section) -> Direct Product Add

as shown in the image below:
