## Introduction

Let your visitors choose desirable delivery dates and time periods to receive orders with the Delivery Date And Time extension. Inform your visitors about available dates and time for delivery. Provide your buyers with a possibility to be demanding about their delivery wishes and set the desired time interval. This extension is not just useful for the customers but even admin can find it very useful. Admin can specify the holidays or time slots for which he wants the delivery to be executed. This extension not only makes the order delivery more certain and convenient for customers but also provides enough controls to the admin to manage the delivery date which the customer chooses.

Since it makes order deliveries more certain for customers, they can schedule their affairs properly and be there to receive the order when it's delivered to them. Admin, on the other hand, saves resources on not having to answer frequent customer queries or deal with failed delivery attempts.

## Backend Settings of the Extension

### Enable the Extension

- Navigate to **Stores > Settings > Configuration > Sunarc > Delivery Date and Time** in Magento Admin Panel.
- **Enable:** Choose **Yes** to enable the Delivery Date and Time extension.
- **Start Time:** Select the delivery start timings.
- **End Time:** Select the delivery end timings.
- **Interval:** Mention the interval time in minutes.
- **Exclude days of the week from delivery:** Select the days which has to be excluded from the week for delivery.

The screenshot shows the SunCart Configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, and System. The 'Stores' icon is highlighted with a red box. The main content area is titled 'Configuration' and features a 'Save Config' button in the top right. A dropdown menu is open, showing 'SUNARC' (highlighted with a red box) and 'Delivery Date and Time' (also highlighted with a red box). Below this, a 'General' configuration panel is visible. It includes fields for 'Enable' (set to 'Yes'), 'Start Time' (set to '08 AM'), 'End Time' (set to '09 PM'), and 'Interval' (set to '120'). There is also a section for 'Exclude days of week from delivery' with a list containing Sunday, Monday, Tuesday, Wednesday, and Thursday.

- **Exclude Delivery on Holidays** - List of holidays can be added or edited here.

## Features of the Extension

### Allow customers to choose date and time of delivery

Offer customers the option to select desired date and time right on the checkout page. Buyers can choose the preferred delivery arrival dates and specify the most comfortable time period by fulfilling only two additional fields.

### Exclude holidays and previous dates from delivery options

The extension allows to block all unavailable delivery dates on the calendar and instantly update clients on your current schedule. This feature of the delivery date module also helps to avoid a common mistake of selecting a day that has already passed.

### Customize delivery intervals

At backend admin can define the most convenient time intervals between the actual order and delivery date and time. It's also possible to indicate by which time an order should be placed if a customer wants to receive an item on the same day.

**Manage delivery time slots**

Set an interval offset for the same day of delivery that will be equal the time between current time and the first delivery time that can be selected by a customer.

**Customers get complete details of the delivery date and time**

Once the order is placed the customer gets the complete details of the delivery date and time of the order placed.
