

# Endless Ajax Scroll

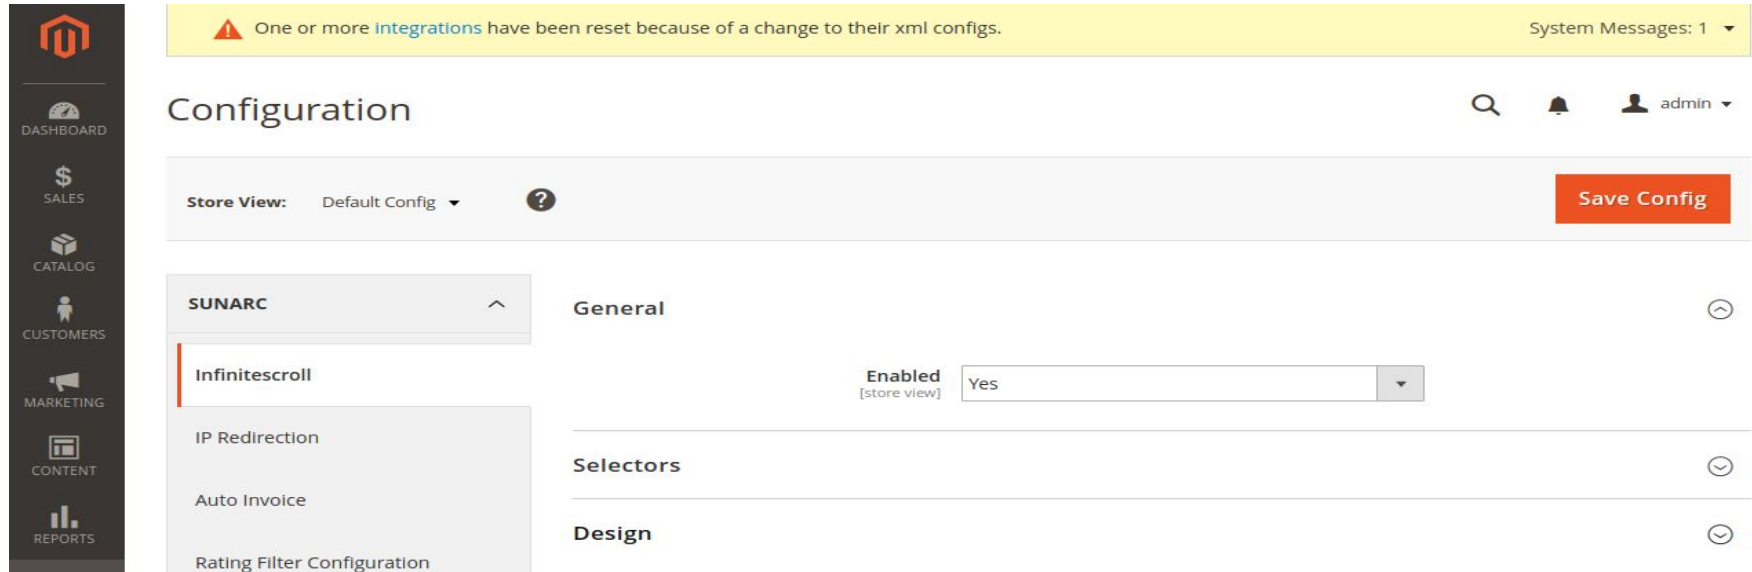

Magento Extension Support User Guide

# Contents

1. Enabling the module
2. Setting up Selectors
3. Setting up design related options
4. Endless Scroll at Frontend

# 1.Enabling the module

To enable the module go to Stores→ Configuration→ Infinitescroll→ General→ Enable→ Yes

The screenshot shows the Magento 2 Configuration interface. At the top, a yellow banner displays a warning: "One or more Integrations have been reset because of a change to their xml configs." with a "System Messages: 1" dropdown. The main heading is "Configuration". Below it, the "Store View" is set to "Default Config" with a help icon. A red "Save Config" button is on the right. The left sidebar lists navigation options: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, and REPORTS. The main content area shows the "SUNARC" configuration tree with "Infinitescroll" selected. Under "Infinitescroll", the "General" tab is active, showing the "Enabled [store view]" dropdown set to "Yes". Other tabs like "Selectors" and "Design" are visible at the bottom.

## 2.Setting up Selectors

Developers can define the selectors they want in Stores→ Configuration→ Infinitescroll→Selectors

---

### Selectors

<b>Content</b> [store view]	<input type="text" value=".column.main"/>
<b>Toolbar</b> [store view]	<input type="text" value=".toolbar"/>
<b>Pagination</b> [store view]	<input type="text" value=".toolbar .limiter"/>
<b>Next</b> [store view]	<input type="text" value=".next"/>
<b>Previous</b> [store view]	<input type="text" value=".previous"/>
<b>Items (grid mode)</b> [store view]	<input type="text" value=".products-grid"/>
<b>Items (list mode)</b> [store view]	<input type="text" value=".products-list"/>

---

### 3.Setting up design related options

We can set Loading image,text ,threshold etc in Stores→ Configuration→ Infinitescroll→Design

#### Design

<b>Loading Image</b> <small>[store view]</small>	<input type="text"/>
	Use absolute URL or relative path to skin path. Leave empty for default.
<b>Loading Text</b> <small>[store view]</small>	<input type="text" value="&lt;em&gt;Loading items...&lt;/em&gt;"/>
<b>Done Text</b> <small>[store view]</small>	<input type="text"/>
<b>Extra Scroll (px)</b> <small>[store view]</small>	<input type="text" value="150"/>
<b>Buffer (px)</b> <small>[store view]</small>	<input type="text" value="150"/>
<b>Load More Threshold</b> <small>[store view]</small>	<input type="text" value="5"/>
<b>Load More Button Text</b> <small>[store view]</small>	<input type="text" value="Load more items"/>
<b>Load Previous button text</b> <small>[store view]</small>	<input type="text" value="Load previous items"/>
