Introduction

"Login With Mobile Number" extension provides an easy way to login to your account using mobile numbers. Every e-commerce store requires a login process and wants the customer to register their accounts by entering all the necessary information. With the help of our extension, the customers can now quickly and easily login to their accounts using their mobile number.

People always want a simple and easy process for the login process or any other process that requires login credentials. Remembering long email addresses can be a bit tedious, but a mobile number is something which one can remember easily. Our extension uses this concept of simplicity of logging in with your mobile number.

Also, you can change your mobile number from the "My Account" section whenever you want. Admin has full authority to keep a track of all the mobile numbers which are being registered in the registration process of the e-commerce store.

Backend Settings of the Extension

Enable the Extension

- Navigate to **Configuration > Sunarc > Mobile Login > Configuration > Enable/Disable**
- **Enable** - Select "Yes" to enable the extension.
- Click on '**Save Config**' to save the configuration settings.

The screenshot shows the SunCart backend configuration interface. On the left is a vertical sidebar with icons for various modules: Dashboard, Sales, Catalog, Customers, Marketing, Content, Sunarc Mobile Login, Reports, Stores, and System. The main content area is titled "Configuration" and shows the "General setting of mobile login" for the "Sunarc" extension. A dropdown menu for "Mobile Login Enable" is open, showing options for "No" and "Yes". A "Save Config" button is visible in the top right corner of the configuration area.

How Does the Extension Work?

On the backend side:

After the set below configuration from backend:

On the Frontend :

Once the extension is installed, it makes the mobile number a mandatory field like email address at the time of registration.

Email *

Mobile Number *

Password *

Password Strength: Strong

Confirm Password *

[Create an Account](#)

Later, when the customer wants to login he can also login using his mobile number.

Customer Login

Registered Customers

If you have an account, sign in with your email address/mobile number
