Introduction

Order Management Through Suborders extension allows to generate suborders according to attributes. It automatically generates orders into multiple suborders based on product attributes.

Whenever Main order (Sales Order) status has been changed than automatically sub order status also changes for example - If black attribute product status changes from main order then automatically suborder of black attribute's status changes.

Note:Currently business users are not able to create the invoice, credit memo refund/shipping for suborders id. Only business users can create the invoice for the main order(sales Order) only.

Backend Settings of the Extension

Enable the Extension

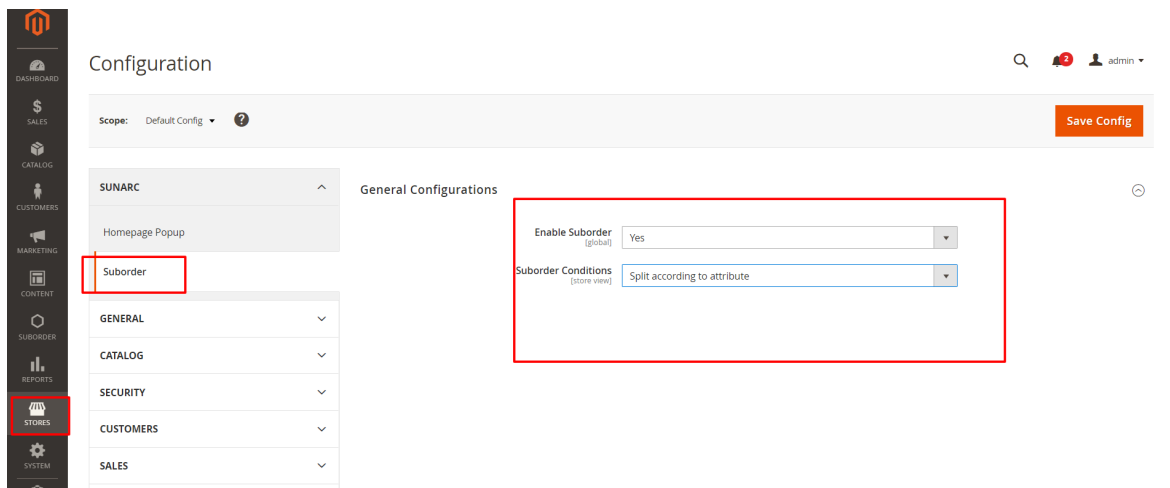

Navigate to **Configuration > Sunarc > Sunarc -> Suborder**

- **Enable** - Select "Yes" to enable the extension.
- Choose **suborder conditions** Split according to attribute

Or

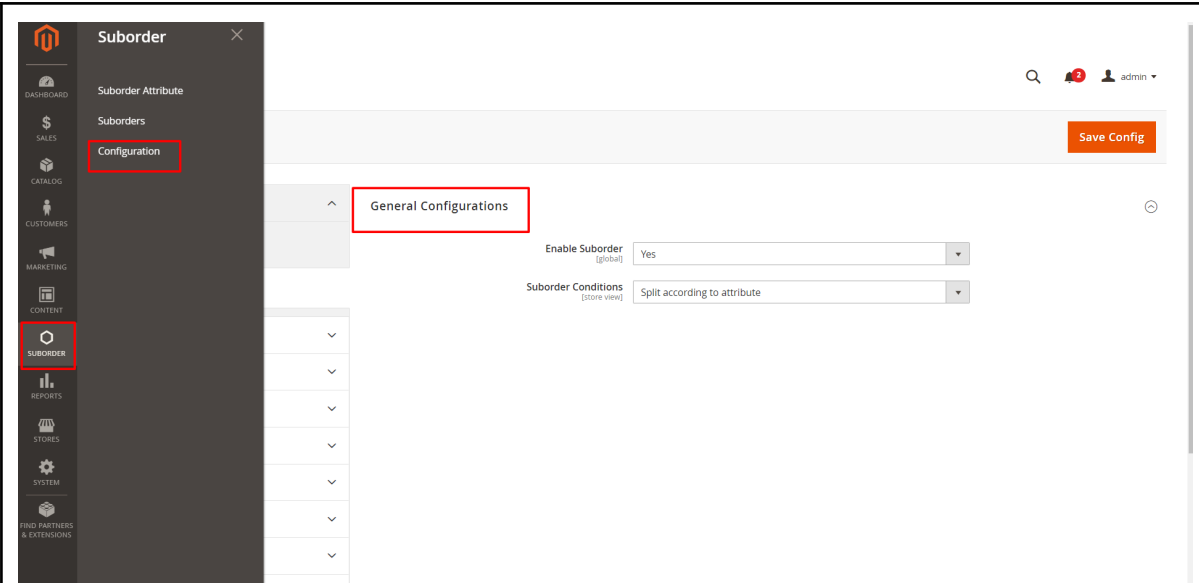

From Magento home screen

- Click to Suborder and choose **Configuration > Sunarc > Sunarc -> Suborder**
- **Enable** - Select "Yes" to enable the extension.
- Choose **suborder conditions** Split according to attribute

The screenshot shows the Magento Configuration page for the Suborder extension. The left sidebar contains a navigation menu with icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Suborder, Reports, Stores, and System. The 'Stores' icon is highlighted with a red box. The main content area is titled 'Configuration' and shows the 'Suborder' configuration page. The 'Suborder' menu item in the sidebar is also highlighted with a red box. The configuration page has a 'Scope: Default Config' dropdown and a 'Save Config' button. The 'General Configurations' section is expanded, showing two settings: 'Enable Suborder (global)' set to 'Yes' and 'Suborder Conditions (store view)' set to 'Split according to attribute'. Both settings are highlighted with a red box.

OR

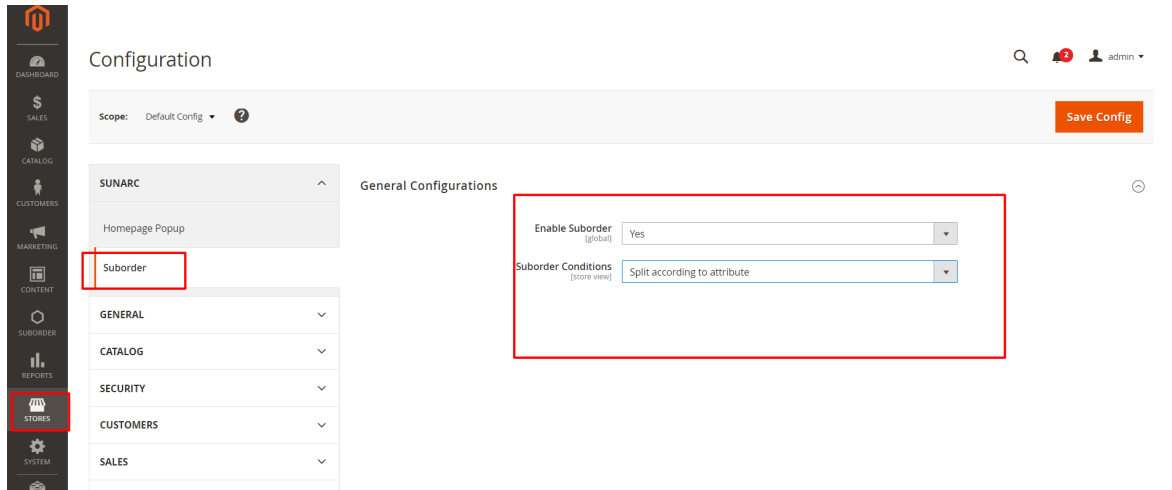

Click on **'Save Config'** to save the configuration settings.

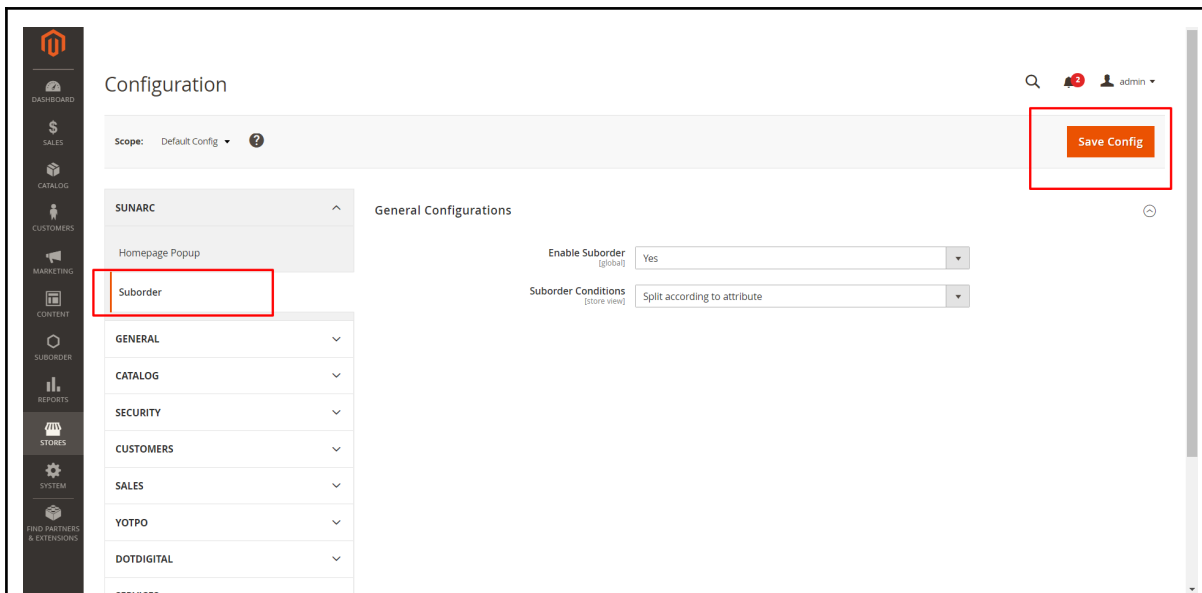

How Does the Extension Work?

On the backend side:

Step 1:- First enable the extension from home screen suborder or can choose from store > Configuration and sub order

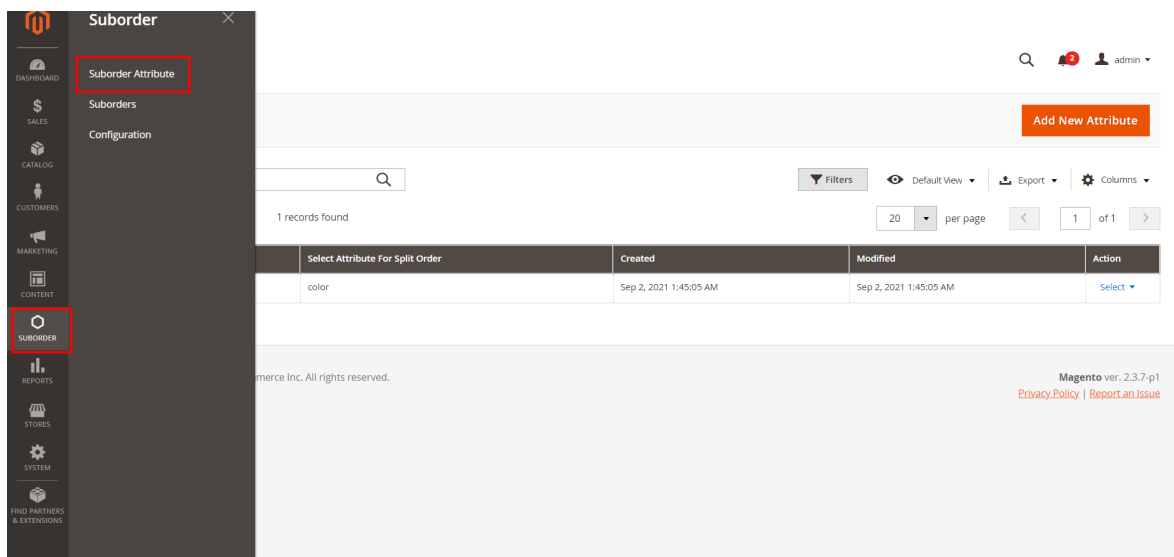

Step 2 :- Save the setting- Configuration

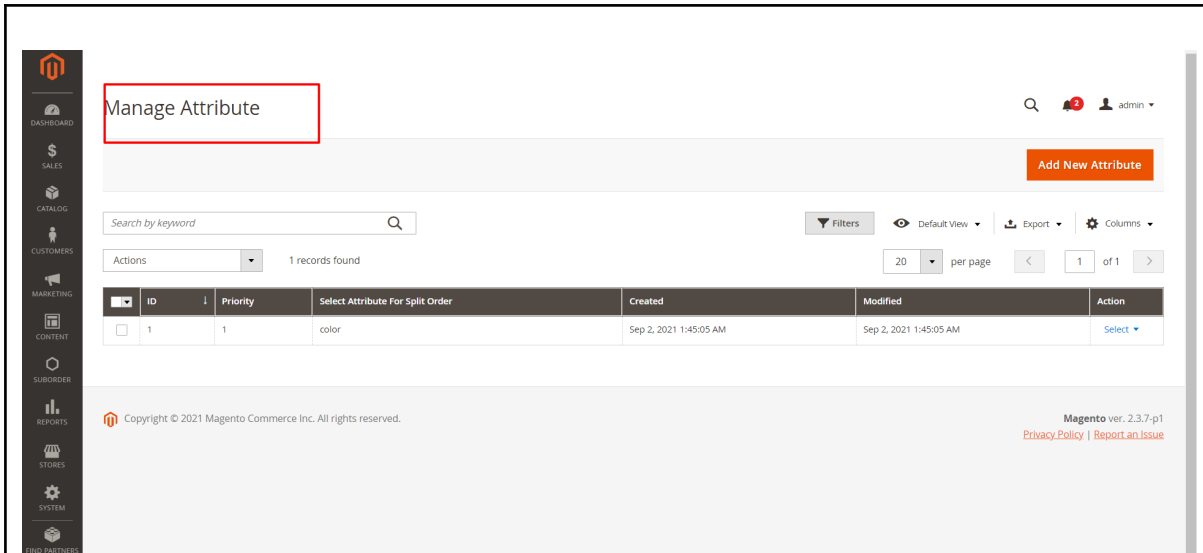

Step 3:- select the attribute for create suborder

From Magento home screen

- Click to Suborder and choose suborder attribute

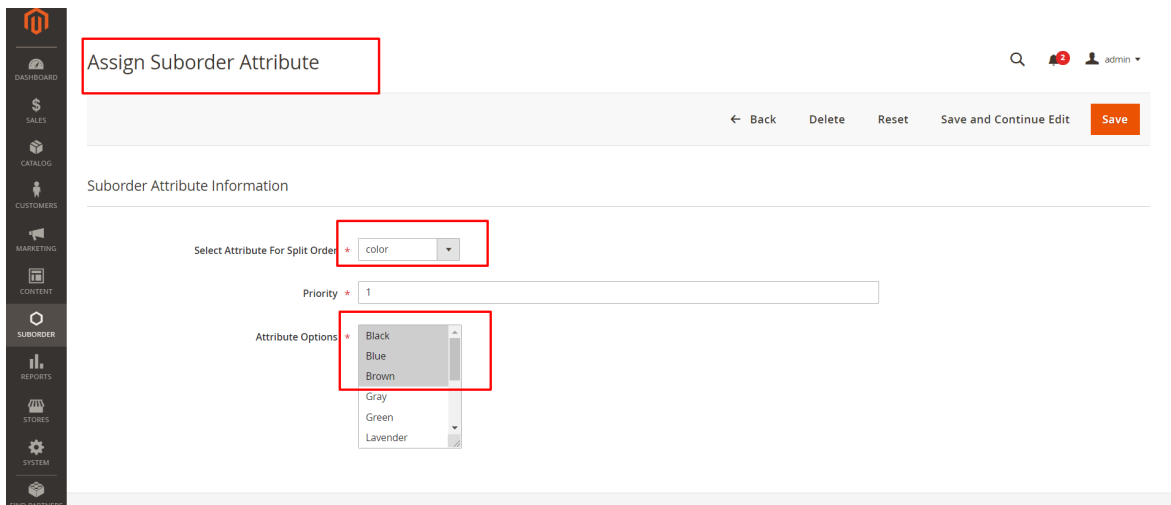

Sub order attribute section: You can add the new attribute or you can choose the attributes as per your website from manage attribute section

As per example you can see attributes chosen as colour for suborders. Admin can edit it as per their website requirement

Note:

In the edit section, admin can assign sub order attributes as per below screenshot you can see that admin chooses colour Black,blue and brown as attribute for creating suborder ids.

When we select Attribute whichever attribute it selects it should have its option value(Attribute options).

Now,if the attribute value selected has the option value then options will automatically get loaded in the option attribute text box.

Step to add option Attribute Options/Value:

Case 1:- If the attribute selected is the default attribute:

Admin Login->Stores->Attribute->Product->Go to Attribute Code(example:-Colour) Click on it->Under Manage Option Value for the attribute Add your attribute Value.

Case 2:- New Attribute:

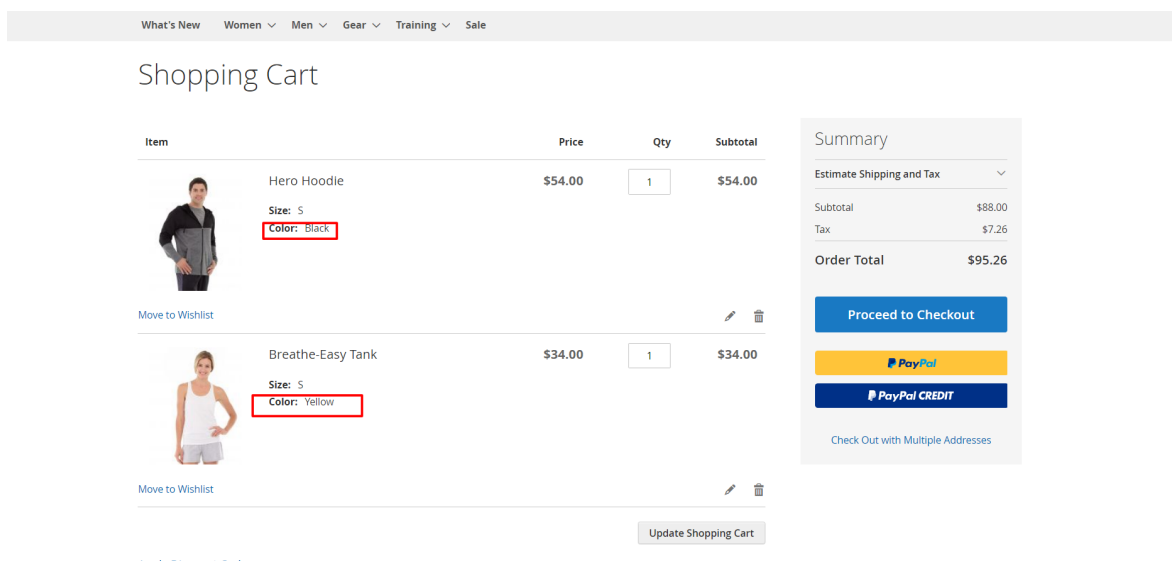

Admin Login->Stores->Attribute->Product->Add New Attribute->Give Attribute Name and Select Dropdown/Multiselect option->Add the value of the Attribute.

On the Frontend :

When the customer add any product which contains colour black or blue or brown with two or more product then this product will check

: If cart contains product having any colour of products into cart which is selected by admin as attribute

Example: As per below screenshot customer added one product Hero hoodie with colour black and Breathe easy tank with colour yellow

The screenshot displays a shopping cart interface. At the top, there are navigation links: What's New, Women, Men, Gear, Training, and Sale. The main heading is "Shopping Cart". Below this, a table lists the items in the cart:

Item	Price	Qty	Subtotal
 Hero Hoodie Size: S Color: Black	\$54.00	1	\$54.00
 Breathe-Easy Tank Size: S Color: Yellow	\$34.00	1	\$34.00

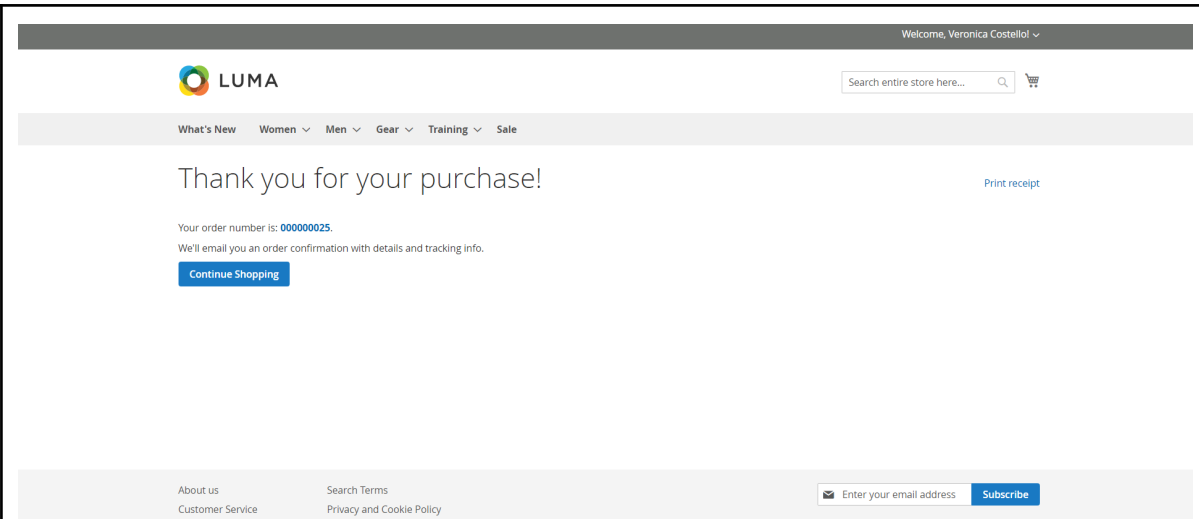

Each item has a "Move to Wishlist" link and a trash icon. At the bottom of the cart, there is an "Update Shopping Cart" button and a link for "Apply Discount Code".

On the right side, a "Summary" box provides a breakdown of costs:

- Estimate Shipping and Tax (dropdown)
- Subtotal: \$88.00
- Tax: \$7.26
- Order Total: \$95.26

Below the summary, there are buttons for "Proceed to Checkout", "PayPal", and "PayPal CREDIT". A link for "Check Out with Multiple Addresses" is also present.

Step 4 :- After the successful checkout - It will create one order id# 000000025.

But in the admin section when business users go and check it will show like this as per the attribute sub order .

Manage Suborders

ID	Order ID	Shipping Amount	G.T. (Base)	G.T.	Status	Split Attr Value	Created	Modified	Action
19	000000025	\$5.00	\$63.46	\$63.46	Pending	Black	Sep 9, 2021 6:54:41 AM	Sep 9, 2021 6:54:41 AM	View
20	000000025	\$5.00	\$41.80	\$41.80	Pending	false	Sep 9, 2021 6:54:41 AM	Sep 9, 2021 6:54:41 AM	View

Admin user can check this suborder at

From Magento home screen

Click to Suborder and choose suborder menu to check suborders as per attributes

Suborder

Features of the Extension

- Create the suborders as per the product attributes
- Customer only able to see one order id on frontend
- Admin can see sub orders details as per selected attributes
- This product supports all Magento product types and most of the famous payment gateway like Paypal.

Note: We have tested the extension on both servers and Mozilla & Chrome browsers (magento2.3.7 and magento2.4.3). It is working fine. Please check the below video links for reference.

[Video 2.3.7 \(Tested\)](#)

[Video 2.4.3 \(Tested\)](#)

Regarding Payment Gateway:

Currently this product only tested with paypal

These will be known/Issue things :

1. Transaction Id only generate for 1 Order Id (Customer will pay for whole cart but transaction Id only comes for 1st Order)
2. Automatic Invoice and refund has not been generated for all orders. Business users can do it manually.
