Save Configuration

Custom webparts

There are multiple custom webparts you can use in your new theme.

- Topbanner

Is a banner where you can place a sale text of a message to your visitors.

- Header

Website header which contains the logo, search box and your cart.

- Homeslider

The custom image slider on the homepage.

-Topmenu

A topmenu for you categories and your main pages.

- Categorymenu

A extra navigation menu based on your categories. For easy access to your products.

-Newsalerecent

A webpart who show by default your new products. But with a menu you can change it to sales and recently viewed products. Or you can use a search box.

-Home accordions

A custom accordion menu which show four products from each category.

-Categoryinthepicture

A webpart that show the picture of 3 categories with a link to the category.

-Features

Four image links to promote features on you sites. You can change the images and the links.

-Categoryhomegrid

Two product grids with four products from two categories of your choice.

You can see the webparts in the image below.

Customise the theme

The webparts above can be customised in the menu at the left side of your screen.

With this menu you can change the appearance of your theme. You can change text, links and images of the webparts in the Chapter "Configure the webparts".

You can enable the menu with custom variable "configure_menu" value 1 (default after install)

Go to Admin Panel System Custom Variables
Change Variable with the following values.

Variable Code: configure_menu

Variable Name: configure_menu

Variable Plain Value: 1

Variable Code *	<input type="text" value="configure_menu"/>
Variable Name *	<input type="text" value="configure_menu"/>
Variable HTML Value	<input type="text"/>
Variable Plain Value	<input type="text" value="1"/>

Save

You can disable the menu with custom variable "configure_menu" value 2.

Go to Admin Panel System Custom Variables
Change Variable with the following values.

Variable Code: configure_menu

Variable Name: configure_menu

Variable Plain Value: 2

Variable Code *	<input type="text" value="configure_menu"/>
Variable Name *	<input type="text" value="configure_menu"/>
Variable HTML Value	<input type="text"/>
Variable Plain Value	<input type="text" value="2"/>

You can change the order of the 5 webparts: topbanner, homeslider, header, top menu and category menu. In the templates below you can see examples that you can use.

Templates

There are 5 templates / examples you can choose from:

Template 1

Template 3

Template 4

A screenshot of a web application for 'Mega Market'. The page features a top navigation bar with the site logo and search options. A left sidebar lists various product categories such as 'Books', 'Music, Movies & Games', 'Toys & Hobbies', 'Health & Beauty', 'Home', 'Sports', 'Fashion', 'Garden', 'Pet Supplies', 'Travel', 'Automotive', 'Electronics', 'Office', 'Baby', 'Food & Beverage', 'Home & Living', 'Tools & Hardware', 'Pet Supplies', 'Travel', 'Automotive', 'Electronics', 'Office', 'Baby', 'Food & Beverage', 'Home & Living', 'Tools & Hardware'. The main content area displays a grid of products, including toys like 'Crayon Fun', 'R/C Race Car', 'Model Ship', 'Toy Crane', and 'Toy Airplane', as well as books like 'The Secret Garden', '1984', 'Lord of the Flies', and 'Een Klein Leven'. Each product card shows an image, title, price, and an 'ADD TO CART' button. Below the product grid, there are promotional banners for 'Free Shipping', 'Money Back Guarantee', 'Free Gift', and 'Secure Shop'. The footer contains social media links, a newsletter sign-up form, and contact information.

Configure the webparts

For some of the webparts you can change the text, links and images.
