Installation

Please follow next steps to complete the installation:

1. Go to store backend and disable compilation mode.
2. Go to your magento store root directory (via FTP or CPanel).
3. Create file `maintenance.flag` in root directory.
4. Open your store in browser; you have to see page `Service Temporarily Unavailable` (if you can not see this page - probably you try to install extension at wrong magento instance).
5. Unpack all files from theme archive into your magento store root directory.
6. Remove file `maintenance.flag` when copy process completed.
7. Login your store admin and start to configure extension.
8. Navigate to `Admin > System > Manage Cache` and flush cache storage.

Configuring

1. Navigate to `Admin > System > Configuration > Content Management` and set WYSIWYG editor to "Disabled by Default" mode.
2. Modify slider at `Admin > CMS > Easyslide`
3. Navigate to `Admin > CMS > Static Blocks`
 1. Create block `homepage` with following code:

```

{{block type="easyslide/slider" name="homepage.m001" slider_id="default_m001"}}
{{block type="catalog/navigation" name="home.nav"
template="catalog/navigation/top.phtml"}}
<script type="text/javascript">
    new MobileNavigation();
</script>

{{widget type="highlight/product_new" title="New Products" products_count="4"
template="highlight/product/sidebar/list.phtml" class_name="highlight-new"}}
{{widget type="highlight/product_special" title="Special Products" products_count="4"
template="highlight/product/sidebar/list.phtml" class_name="highlight-special"}}
{{widget type="highlight/product_reports_viewed" title="Recently Viewed"
products_count="15" template="highlight/product/sidebar/list.phtml" class_name="highlight-
recently"}}

{{block type="newsletter/subscribe" name="left.newsletter"
template="newsletter/subscribe.phtml"}}

```

2. Create block `footer_links_mobile` with following code:

```

<ul>
    <li><a href="{{store direct_url='about-magento-demo-store'}}">About Us</a></li>
    <li><a href="{{store direct_url='customer-service'}}">Customer Service</a></li>
    <li class="last"><a href="{{store direct_url='contacts'}}">Contact Us</a></li>
</ul>

```

4. Navigate to `Admin > Cms > Static Blocks` to add “Switch to desktop” and “Switch to mobile version” links

1. Open `footer_links_mobile` block and add the following content to the bottom of the block:

```

<ul>
    <li class="last"><a href="{{store direct_url='mobileswitcher/index/desktop'}}"
rel="nofollow">Desktop Version</a></li>
</ul>

```

2. Open the `footer_link` static block of your desktop theme and add the following link:

```

<a href="{{store direct_url='mobileswitcher/index/mobile'}}" rel="nofollow">Mobile
Version</a>

```

5. Navigate to `Admin > System > Configuration > Design > Themes` and add `m001` exception to the following fields:

- Layouts
- Templates
- Skins

Use the following Expression in order to detect mobile devices

```
iPhone|iPod|BlackBerry|Palm|Googlebot-Mobile|Mobile|mobile|mobi|Windows  
Mobile|Safari Mobile|Android|Opera Mini
```

6. That's all. Navigate to your home page and check how your new store looks.

If you have any problems with templates installation please contact us at templates-master.com/contacts/ (<http://templates-master.com/contacts/>) and we will help you with template installation for free.
