

Configuration

The **Ajax Layered Navigation** extension comes with flexible and easy to use configuration.

Go to **Magento Admin > Stores > Configuration > Swisstup > AjaxLayeredNavigation** .

Use **Ajax** - Enable/Disable ajax page content update.

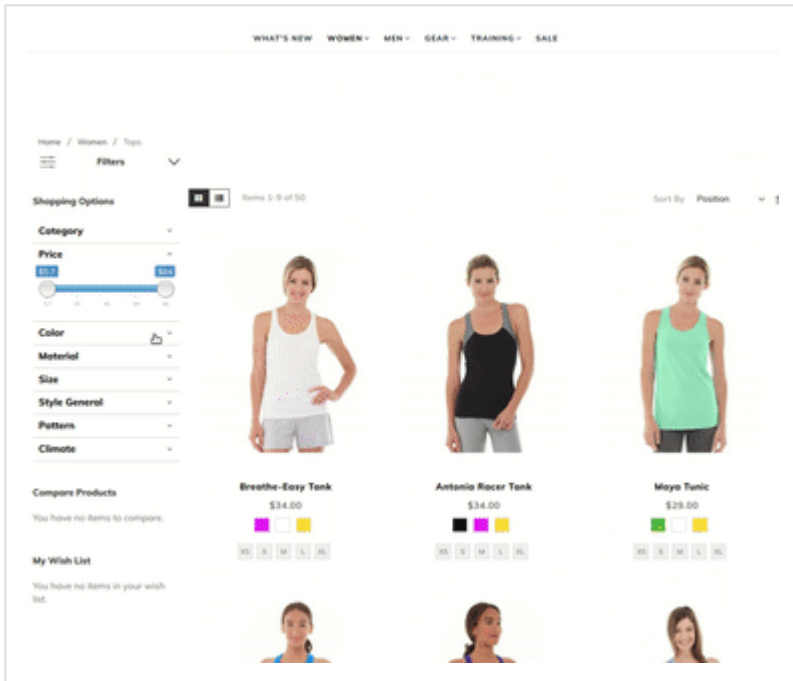

The screenshot shows the configuration interface for the Ajax Layered Navigation extension. On the left is a navigation menu with categories: CATALOG, SWISSUP THEMES EDITOR, SWISSUP CHECKOUT, SWISSUP (expanded), Ajaxpro, Akismet, Ajaxsearch, Askit, Ajax Layered Navigation (highlighted), Core, and Easy Catalog Images. The main area contains the following settings:

Setting Name	Value
Use Ajax [store view]	Yes
Enable scroll to top after ajax reload [store view]	Yes
Enable sticky layered navigation [store view]	Yes
Enable filters slideout [store view]	Yes

Style General

Show options qty - Enable/Disable the quantity of options.

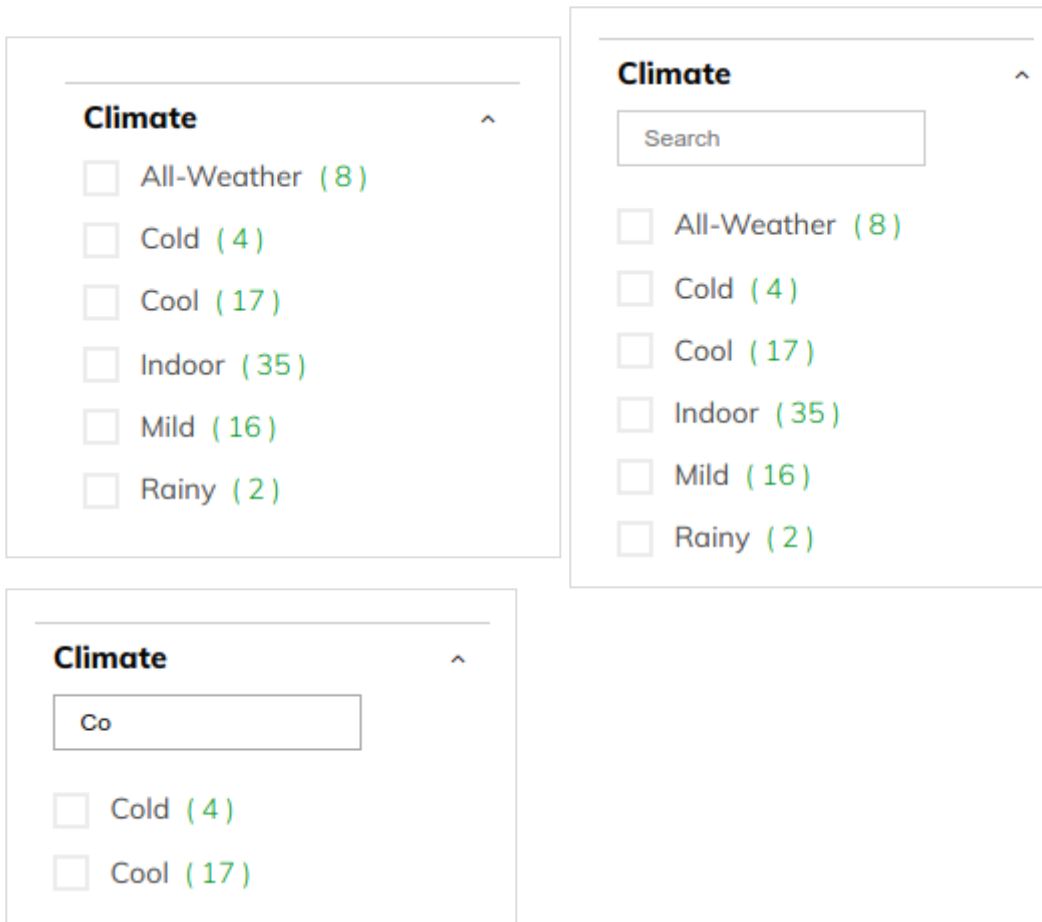

The display of search box in a product filter

A handy search box will help your customers find the items instantly.

Show search by options - Enable/Disable a search box by options.

Show search form when options count is larger than - show search if there are more options than 5 for example. It depends on the previous config option.

The control of the number shown filter values

You can determine the number of displayed filter values for long filter lists. That will make the navigation menu easy to perceive.

Show + More button - Enable/Disable + More behaviour.

Show '+ More' when options count is larger than - set the number of unfolded options. It depends on the previous config option.
