# Ajaxsearch

Magento2 module for adding advanced search providers. Improves search results box.

The screenshot shows a Magento 2 search results page. At the top, there is a dark grey navigation bar with the text "Default welcome msg! Sign In or Create an Account". Below this is a search bar containing the text "bag" and a search icon. To the right of the search bar is a shopping cart icon with the number "31". Below the search bar is a large grey rectangular area, likely a placeholder for search results. Below this area is a "Sort By" dropdown menu set to "Position" with an upward arrow icon. Below the dropdown are two product listings. The first listing is for a "Driven Backpack" with a price of \$36.00, a 5-star rating, and "2 reviews". The second listing is for an "Endeavor Daytrip Backpack" with a price of \$33.00, a 4.5-star rating, and "3 reviews".

# Configuration

## Main

**Limit**  [STORE VIEW]

The max number of suggestions to be displayed. Defaults to 10.

**Highlight**  [STORE VIEW]

If true, when suggestions are rendered, pattern matches for the current query in text nodes will be wrapped in a strong element with its class set to `{{classNames.highlight}}`. Defaults to true.

**Hint**  [STORE VIEW]

If false, the typeahead will not show a hint. Defaults to true.

**Minimal Query Length**  [STORE VIEW]

The minimum character length needed before suggestions start getting rendered. Defaults to 3.
