Configuration

Main

Limit	<input type="text" value="10"/>	[STORE VIEW]
The max number of suggestions to be displayed. Defaults to 10.		
Highlight	<input type="text" value="Yes"/> ▼	[STORE VIEW]
If true, when suggestions are rendered, pattern matches for the current query in text nodes will be wrapped in a strong element with its class set to <code>{{classNames.highlight}}</code> . Defaults to true.		
Hint	<input type="text" value="Yes"/> ▼	[STORE VIEW]
If false, the typeahead will not show a hint. Defaults to true.		
Minimal Query Length	<input type="text" value="3"/>	[STORE VIEW]
The minimum character length needed before suggestions start getting rendered. Defaults to 3.		

Main

- **Limit** - set up the max number of suggestions to be displayed.
- **Highlight** - select **Yes** to enable a backlight for first letters of suggestion in the search box.
- **Hint** - select **Yes** to enable adding hint text for the search box. This option provides user with many helpful hints and allow him to select a proper variant and to complete a search field faster.

- Minimal Query length - set up a minimum character length.
