3. Magento's built-in WYSIWYG Editor is buggy, and we insist upon disabling it by default.

Navigate to [Stores](#) > [Configuration](#) > [General](#) > [Content Management](#) and change [Enable WYSIWYG Editor](#) option to [Disabled by Default](#) to prevent problems with homepage and cms blocks content.

4. Create the homepage with following content:

```
<div class="argento-grid">
  <div class="item col-md-11">
    {{widget type="Swissup\EasySlide\Block\Slider" identifier="argento_essence"}}
  </div>
  <div class="item col-md-5 argento-grid cols-xs-3 cols-md-1 no-padding">
    <a class="item" href="{{store url='delivery'}}"><a href="{{store url='hp-envy-17'}}">
  <div class="blocks-main item col-md-11" data-mage-init='{"argentoTabs": {}}'>
    {{widget type="Swissup\Highlight\Block\ProductList\NewList" title="New Products" products_c
    {{widget type="Swissup\Highlight\Block\ProductList\Onsale" title="Special Offers" products_
    {{widget type="Swissup\Highlight\Block\ProductList\Attribute\Yesno" title="Coming soon" att
  </div>
  <div class="sidebar blocks-secondary item col-md-5 argento-grid cols-xs-1 cols-sm-2 cols-md-1 r
    <div class="item">{{widget type="Swissup\Testimonials\Block\Widgets\SideReview"}}</div>
    <div class="item">{{widget type="Swissup\Highlight\Block\ProductList\Bestsellers" title="Be
    <div class="item">{{widget type="Swissup\Highlight\Block\ProductList\Popular" title="Popula
  </div>
</div>

<div class="block widget block-promo block-carousel">
  <div class="block-title">
    <strong>Featured Brands</strong>
  </div>
  <div class="block-content">
    <div data-mage-init='{"slick": {"slidesToShow": 6, "slidesToScroll": 6, "dots": false, "aut
      <div><a href="#"><a href="#"><a href="#"><a href="#"><a href="#"><a href="#"><a href="#"><a href="#"><a href="#"><a href="#"><a href="#"><a href="#">
  </div>
</div>
```

5. Create header_cms_links cms block with following content:

```
<ul class="header links header-cms-links">
  <li class="first"><a href="{{store url='support'}}">support</a></li>
  <li><a href="{{store url='faq'}}">faq</a></li>
  <li class="last"><a href="{{store url='knowledgebase'}}">knowledge base</a></li>
