

Installation

Run the following commands to install and enable bundled modules:

```
composer require swissup/breeze-blank
bin/magento setup:upgrade
```

The list of packages that will be installed:

Package Name	Description
swissup/theme-frontend-breeze-blank	Breeze Blank Theme
swissup/module-breeze	Breeze Module
swissup/module-breeze-integrations	Third-party modules integrations
swissup/module-rtl	RTL Direction Module

Setup

We recommend installing our [swissup/marketplace module](#), and run theme installer from command line:

```
composer require swissup/module-marketplace
bin/magento setup:upgrade
bin/magento marketplace:package:install swissup/breeze-blank
```

Installer will ask you to select a store, then it will create CMS content, and change your current theme to the `swissup/theme-frontend-breeze-blank`.

Manual setup

If you don't want to use installer from the section above, you should activate Breeze manually.

1. Login to Magento backend and open *Content > Design > Configuration* page.
2. Select the Store you want to change and press *Edit*.
3. Select **Breeze Blank** theme in the *Applied Theme* dropdown and save configuration.
4. Navigate to *Content > Pages* and create new homepage using Magento's Pagebuilder editor.
